v11.3.0

August 2023

ATIPXpress PAL 11.3.0 Release Notes

Product Enhancements

See the following sections for product enhancements you can look forward to in the latest version of ATIPXpress PAL.

ID	Feature	Description
27991 27992 27993 27994 27996 27997	Fortify Security Scan	Fortify Static Code Analyzer (SCA) is a security testing tool used to identify security vulnerabilities in an application's source code. We've made several updates to our PAL code to address issues identified in our Fortify security scans.
9293	Search Requests from Unregistered Users	When the "Enable Non PAL Status Requests Information" option is selected in PAL Configuration, requests will be searchable in PAL even if the requester is not a registered PAL user.
23997	Language Dropdown Configurable	In PAL registration, we've made the Language selection field configurable. PAL Administrators can elect to make this field optional or required and can elect to show or hide the field.
26033	Basic SMTP Authorization	PAL can now be configured for basic SMTP authorization using SSL User Name and SSL Password. Select "Basic" under "SMTP Authorization" in the PAL Configuration interface to utilize basic SMTP authorization.

Bug Fixes

We've addressed some issues identified by our customers as well as our OPEXUS team. These bug fixes are outlined in the table below.

ID	Description
21775	Fixed a bug in which a PAL processing alert error triggered multiple email notifications.
21850	Resolved an issue preventing PAL Reading Room FCD's from updating properly.
23273	Added text to the incorrect password alert message on the PAL sign in page.
23314	Corrected a bug causing the Language button on the PAL welcome screen to show French as an option when the page is already translated to French.
23579	Reformatted the PAL sign in page to minimize empty space and improve user experience.
24155	Corrected the format of the "Thank you for your payment" message on PAL mobile screen view for improved clarity.
27905	Updated text on a PAL application validation message that incorrectly referenced zip codes instead of the postal codes.
28170	Resolved an error with Reading Room search results due to a missing entry in database.
