1 Introduction

1.1 Scope

The purpose of this manual is to guide the user through configuration settings for the Public Access Link (PAL) application.

1.2 Overview

ATIPXpress PAL facilitates the submission of ATIP (Access to Information and Privacy) requests over the internet and allows information to be published to the Electronic Reading Room. ATIPXpress PAL is only supported on SQL Databases.

1.3 Getting Started

Before proceeding with the installation, it is necessary to do the following:

- Install and setup the ATIPXpress application and related components.
- Install the PAL application and related components.
- Configure the SMTP Server to relay email to the email server while using ATIPXpress PAL. The SMTP server must be configured to relay email messages to other domains.

1.4 References

The following resources were used as a reference in preparing this manual:

- ATIPXpress PAL Server Installation Manual
- ATIPXpress Online Manual

2 Enabling PAL Options in ATIPXpress

To configure PAL for use, it is necessary to enable PAL and its associated options (**Action Offices, Request Types, Custom Fields, Requester Categories, and Miscellaneous Fields**) in the ATIPXpress application. By doing this, the information displays in the PAL application.

(!!) Notes:

- The information in this section expects the ATIPXpress application to be installed and configured for use.
- You must be a member of the Admin group to enable PAL options.
- For further information concerning PAL options, please refer to the ATIPXpress Online Manual.

Follow the steps below to enable the ATIPXpress PAL:

1. Log in to the ATIPXpress application as an Administrator.
2. Click **Administration > System Configuration > PAL Configuration**. The *PAL Configuration* screen appears.
3. Select the **Enable PAL (Public Access Link) Options** checkbox.
4. Select the **Show Add to Reading Room Prompt When Closing Request** checkbox.
5. Select a **Default Document Publishing Format**.
6. Click **Save** to retain your modified settings, and then click **OK** within the confirmation window.

(!!) Note: An option to *Show in PAL* becomes visible for all PAL objects.

2.1 Action Offices

An Action Office is a location (region or department) that shares your instance of ATIPXpress for receiving and responding to ATIP/PA requests. Complete the steps below to configure Action Offices for the PAL:

1. Select **Administration > Organization Setup > Action Offices**. The *Action Offices* screen appears.
2. In the list, click the **Office Code** you want to configure to *Show in PAL*, and then click the **Show in PAL (Public Access Link)** checkbox, as shown in the image below.

3. Click **Save**.
4. Click **OK** to retain your settings.
5. Click **OK**.
6. Repeat steps 2 through 5 for each Action Office to show in PAL, or click **Close** when Action Offices are fully configured.

2.2 Custom Fields

Custom Fields are user-defined fields that can be used as an index for search and retrieval of records, as filter criteria in a custom report or used to include information specific to a request, requester, or document that is not covered elsewhere in the application to avoid redundancy. By default, ATIPXpress provides built-in Custom Tabs for Request, Requester and PAL Reading Room, that can be renamed and customized.

7. Select **Administration > Document Management > PAL Reading Room Custom Fields**. The *PAL Reading Room Custom Field Groups* window appears.

8. In the list of **PAL Reading Room Custom Field Group** names, click the row of the group containing one or more field names you want to configure to Show in PAL, and then click **Fields**.
 - a. You can also create a new custom field group, or add fields to an existing custom field groups within this screen.
9. In the list of field names, click the field **Name** to configure, and then select the **Show in PAL (Public Access Link)** check box, as shown in the picture below.

PAL Reading Room Custom Field Details

Name* : Service Center Location

Type* : List Option - Single List Options* Program Offices Required

Length* : 40 Characters

Display Width* : 200 Pixels

Note: * fields are mandatory

(!!) Note: You can click the Move Up and Move Down arrows to configure the order of the Custom Fields that displays in PAL.

10. Click **Save**.
11. Click **OK**.
12. Repeat steps 3 through 5 for each field to configure to *Show in PAL (Public Access Link)*, or click **Close**.

2.3 Lookups

Lookups are pre-defined fields configured for most drop down lists in ATIPXpress. Of the different types of fields, the following are used in PAL:

- Appeal Sub Types
- Delivery Modes

- List Options
- Payment Modes
- Requester Prefixes
- Requester Suffixes

Within the Appeal Sub Types and Delivery Fields menu options, you can create, edit or enable lookups to appear in PAL.

(!!) Notes:

- **List Options are values used in conjunction with Custom Fields in ATIPXpress.**
- **For the purposes of these instructions, Requester Prefixes will be the type of Lookup used.**

Follow the steps below to configure Lookups for PAL:

1. Select **Administration > Lookups > Requester Prefixes**. The *Requester Prefixes* screen appears.
2. In the list of prefixes, click the **Prefix** to show in PAL, and then click the **Show in PAL (Public Access Link)** checkbox, as shown in the picture below.

3. Click **Save**.
4. Click **OK**.
5. Repeat steps 2 through 4 for each prefix you want to *Show in PAL* or click **Close**.

2.4 Request Types

ATIPXpress provides you with default request types such as ATIP, PA, or ATIP/PA. Your agency can create new request types, edit existing request types, and delete request types based on their needs.

1. Select **Administration > Request Management > Request Types**. The *Request Types* screen appears.

2. In the list of Request Type names, click the **Name** you want to configure, and then click the **Show in PAL (Public Access Link)** checkbox, as shown below.

3. Click **Save**.
4. Click **OK** to retain your modifications.
5. Repeat steps 2 through 4 for each Request Type you want to show in PAL, or click **Close**.

2.5 Requester Categories

A requester must be classified in a specific category, known as a Requester Category. The category to which a requester belongs is a qualifying factor for granting a request for waiving the fee and/or expediting a request. ATIPXpress provides default requester categories. Your agency can create new requester categories, edit an existing requester category, and delete requester categories based on their needs.

1. Select **Administration > Request Management > Requester Categories**. The *Requester Categories* screen appears.
2. In the list, click the **Name of the Requester Category** you want to configure to show in PAL.
3. Click the **Show in PAL (Public Access Link)** checkbox, and click **Save**.
4. A verification message appears. Click **OK** to retain the settings.
5. Repeat steps 2 through 4 for each additional Requester Category to show in PAL, or click **Close**.

3 Setting Up the PAL Application

Once the PAL objects have been enabled in ATIPXpress, they are synchronized and you can begin setting up the PAL environment.

(!!) Notes:

- Users must be a member of the Admin group in order to log into the PAL Configuration application.
- Users must reboot the server once the configurations are completed in order to reflect the settings in the application.

3.1 Database Configuration

The information presented on this screen is automatically populated with data taken from the PAL installation. Updating this screen is unnecessary unless a new PAL database needs to be configured.

The screenshot shows a web-based configuration interface titled "Database Connection Configuration". It contains several input fields and buttons. The "Database Type" is set to "SQLSERVER" via a dropdown menu. The "Server Name" is "tw-ainsdocs", the "Database Name" is "paldb", and the "Login Name" is "afxpagent". The "Windows Authentication" checkbox is unchecked. The "Password" field is masked with four dots. There are "Save" and "Clear" buttons at the bottom. A note at the bottom states: "Note: Restart the Application Server after saving for the changes to reflect in the application."

Database Type:	SQLSERVER
Server Name :	tw-ainsdocs
Database Name :	paldb
Windows Authentication :	<input type="checkbox"/>
Login Name :	afxpagent
Password:

Note: Restart the Application Server after saving for the changes to reflect in the application.

3.2 General Settings

The information provided on this screen is specific to your agency.

Save

Clear

Enter general information details based on your agency's requirements as outlined in the table below.

1. Click **Save**.
2. A verification message displays. Click **OK** to retain the settings.

Field Name	Description
Application Title	The name of the PAL application as it appears in the title bar of the browser program. "PAL Application" is the default value.
Application URL	The web address for the PAL application. This address appears in the address bar of the browser program.

Field Name	Description
Application Version	The version of the installed application. This field is read-only and not editable.
Enterprise Hours	The time period (in hours) for accepting ATIP requests. Requests submitted after this period will be received the next day the office is open for business.
Number of Records Per Page	The number of lines a requester is able to view after a search is executed. An example is searching documents in the Reading Room.
Error Log Path	Select an output path for the error log file.
Enable SMTP Server	This option allows requesters to receive messages in PAL. When selected, you must enter the SMTP Server Name/Address and Port .
Enable Send Email	When selected, displays the Send Email link in the left panel of the PAL application. This link allows requesters to send a message to the contact email address for the enterprise.
508 JAWS Instructions Note	A brief narrative that directs users to the location for assistance with JAWS.
Save	Accepts and retains the submitted information.
Clear	Removes information entered in the screen.

3.3 Enterprise

The information on this screen represents the agency's mailing and contact information. Administrators can upload the agency's logo if one exists. By default, the *Enterprise Configuration* screen appears when PAL Configuration is launched.

1. Enter enterprise details, as outlined in the table below:

Field Name	Description
Enterprise Name	The identity of the agency.
Address	The street location of the agency.
City	The name of the city where the agency is located.
State	The name of the state where the agency is located.
Country	The name of the country where the agency is located.
Zip Code	The five or nine digit postal code for the agency.
Phone	The telephone number assigned to the agency.
Fax	The telephone number assigned to the agency's fax machine.
Contact Name	The name of the representative for the agency.
Contact Email	The electronic address for all automated email messages sent from PAL.
Clear Logo	Prompts the user to verify if the logo should be removed. When acknowledged by the user, the logo is removed, the field resets and the button becomes disabled.

Setting Up the PAL Application

Field Name	Description
Select Logo	Allows the user to browse the system for an image file, uploads the file, then displays a portion of the image in the available field. The acceptable file formats are JPG, GIF or BMP.
Save	Accepts information entered on the screen.
Clear	Removes information entered on the screen.

2. A verification message appears. Click **OK** to retain the settings.
3. Click **Save**.
4. A verification message appears. Click **OK** to retain the settings.

The screenshot shows a web-based form titled "Enterprise Configuration". At the top, a red message states: "Please complete all the required fields marked with an asterisk (*).". A "Spell Check" link is visible in the top right corner. The form contains several input fields, some of which are marked with a red asterisk to indicate they are required. The fields and their values are as follows:

- * Enterprise Name:** JAINS, Inc.
- Address:** 806 W. Diamond Ave., Suite 400
- City:** Gaithersburg
- State:** Maryland
- Country:** United States
- Zip Code:** 20878
- Phone:** 301-670-2300
- Fax:** 301-670-2841
- Contact Name:** Marcia Kemp
- * Contact Email:** mkemp@jains.com
- Image Logo Path:** (Max. size: 120 * 120 pixels)

Below the input fields, there is a preview of the logo, which is a stylized 'Y' shape inside a circle. To the right of the logo preview are two buttons: "Clear Logo" and "Select Logo". At the bottom of the form are two buttons: "Save" and "Clear".

3.4 Modules

PAL has two modules: *Requester Interface* and *PAL Reading Room*. The *Requester Interface* allows requesters to submit requests, check the status of a request, create a profile and receive documents. The *Electronic Reading Room* allows ATIP Specialists to publish documents for searching and viewing by the public from within ATIPXpress. The *Dashboard*

Setting Up the PAL Application

module allows requesters to generate reports and graphs of data based on pre-configured queries and filtered criteria configured by the PAL administrator.

1. Enter the locations for Delivered and Electronic Reading Room Documents.
2. Click the **Enable send message to office** option, if required. This option displays the **Compose Message** link in the submitted request which allows requesters to send messages to the ATIP office.
3. Enter the web address for the *Dashboard Administration* and *Dashboard* modules.
4. Click **Save**.
5. A verification message appears. Click **OK** to retain the settings.

The screenshot shows the 'Modules Configuration' window. At the top, it says 'To enable or disable a module, use the checkbox next to it.' There are three sections, each with a checkbox and a text input field. The first section is 'Requester Interface Module' with a checked checkbox, a text field for 'Location for Delivered Documents' containing 'C:\PALREADINGROOM\DOWNLOAD', and a checked checkbox for 'Enable send message to office'. The second section is 'Electronic Reading Room Module' with a checked checkbox and a text field for 'Location for Electronic Reading Room Documents' containing 'C:\PALREADINGROOM'. The third section is 'Dashboard Module' with a checked checkbox, a text field for 'Administration URL' containing 'http://tw-ainsdocs:82/PXConfig/', and a text field for 'Application URL' containing 'http://tw-ainsdocs:81/PX'. A 'Save' button is at the bottom. A note at the bottom states: 'Note: Restart the Application Server after saving for the changes to reflect in the application.'

6. The **Dashboard Administration** link appears in the left panel of the PAL Configuration application and the **Dashboard** link appears in the *Main Menu* of the PAL application.

(!!) Note: The Dashboard option in Main Menu Links Configuration must be enabled for the link to appear in the Main Menu of the PAL application.

Access to Information Act (ATIA)

We hope you will find this site informative and useful and that it will give you a better understanding of the Access to Information Act (ATIA) and its implementation at the [Agency].

Click on the links available on the left side panel to learn more about the application.

3.5 Security

Since PAL is accessed by the public sector, it is necessary to provide requesters with a secure environment. The *Security Configuration* screen allows the PAL administrator to establish a Password Policy for requesters accessing PAL information and data.

To change default values, enter the following information outlined in the table below:

Field Name	Description
Default Values	Administers the system default values and disables the Password Never Expires and User Account Inactivation options.
Password Never Expires	This checkbox permits passwords to not become invalid.

Field Name	Description
Passwords are valid for	Specifies how long (in days) the current password can be used. This field becomes disabled when the Passwords Never Expire checkbox is selected.
Remind User	Provides a system prompt for a specified number of days before a password is to expire and provides the user the option to change the password. This field becomes disabled when the Passwords Never Expire checkbox is selected.
Do not allow reuse of last	This option limits the use of previous passwords used to access PAL.
Password can contain up to	Sets the character length for recurring characters in a password.
Minimum password length	Sets the lowest number of characters a password can contain.
Password must contain at least (4)	Sets the number of uppercase letters, lowercase letters, special characters, and numeric characters that make up the password.
Display Visual verification image (CAPTCHA) after	Displays the CAPTCHA security feature during invalid user login attempts.
Login fails after	Sets how many times a user can unsuccessfully attempt to access the system. If the number of attempts exceeds this value, the user account is inactivated by the system.

Field Name	Description
Session time-out after	Sets how long a user can remain logged into ATIPXpress (in minutes) before the application terminates. The user must login to the application again to continue any activity currently in progress.
Alert user before Session expires for	Sets the time (in minutes) to remind the user before the session expires. The system will prompt the user when the session is to terminate and provide options to continue or end the session.
User Account Inactivation	Disables a user account for use in PAL. This field becomes disabled when the Password Never Expires option is selected.
Inactive user account after	This field is enabled if the User Account Inactivation option is selected. This field sets the number of days the account is to remain unusable in PAL.
Username and Password allowed to Match (partial or Full)	Allows the username and password to have some or all of the same string of characters.
Require Temporary Password Update after Login	Allows new users to change the temporary password after logging into PAL for the first time with the temporary password.
Apply Password Policy to Administrator	Employs the password policy to the PAL Administrator.
Save	Accepts information entered on the screen.

Setting Up the PAL Application

Field Name	Description
Clear	Removes information entered on the screen.

Security Configuration
Please complete all the required fields marked with an asterisk[].*

☒ Default values

- Passwords never expire
- * Passwords are valid for: 90 days
- * Remind user: 5 days before password expires
- * Do not allow reuse of last: 12 passwords (including current)
- * Password can contain up to: 2 repeating character(s)
- * Minimum password length: 8 characters
- * Password must contain at least: 2 uppercase letter(s)
- * Password must contain at least: 2 lowercase letter(s)
- * Password must contain at least: 2 special character(s)
- * Password must contain at least: 2 numeric character(s)
- * Display Visual verification image(CAPTCHA) after
- * Login fails after: 3 unsuccessful Sign in attempts
- * Session time-out after: 10 invalid login attempts
- * Alert user before Session expires for: 15 minutes
- User Account Inactivation: 1 minutes
- Inactive user account after: 30 days of inactivity
- Username and Password Allowed to Match (Partial or Full): ☒
- Require Temporary Password Update after Login: ☐
- Apply Password Policy to Administrator: ☒

Save Clear

Note: Maximum password length allowed is 16 characters.
Total password length constitutes of uppercase, lowercase letters and special, numeric characters.

3.6 Authentication

The *Authentication* configuration allows for integration with login.gov for login with forms authentication using one-time password, as well as login using SAML Authentication for integration with login.gov. The *Authentication Configuration* is shown below:

Authentication Configuration
*Please complete all the required fields marked with an asterisk(*).*

Authentication Options

☒ Enable Login with Forms Authentication

OTP Settings

* OTP Notification Type: None

* OTP Expiry Time: 5

☐ Enable Login with SAML Authentication

Use SAML Configuration Tool for configuring identity provider.

Save

To enable login using Forms Authentication, select the **Enable Login with Forms Authentication** option. There are additional fields to configure *OTP Settings*, and you are required to select an **OTP Notification Type** (select **None** to disable OTP), as well as the **OTP Expiry Time** (in minutes).

To enable Login with SAML Authentication, select the **Enable Login with SAML Authentication** option, then use the **SAML Configuration Tool** to complete the SAML configuration process. See the *SAML Configuration Tool* document for steps to run this tool.

Click **Save** to save any changes made to the *Authentication Configuration*.

3.6.1 Authentication Configuration & Identity Validation

Identity Validation (i.e., Login.gov or ID.me) integration is used to authenticate a requester's proof of identity when submitting a request through PAL. There are two methods of authentication which can be utilized by AX PAL: Identity Assurance Level 1 (IAL1) and Identity Assurance Level 2 (IAL2). IAL1 authenticates via standard Username and Password entry, whereas IAL2 leverages an additional Identity Validation Solution to provide proof of identity.

IAL1 authentication is recommended for general login to PAL to ensure requesters are not required to submit proof of identity, unless they are submitting a request type that requires it. The second level of configuration, IAL2, is enabled only when a request type requiring Proof of Identity is selected.

To configure the SAML authentication method for requesters, navigate to the **PAL Configuration > Authentication**. Within the *Authentication Options* workspace, select the **Enable Login with SAML Authentication** radio button and click **Save**.

Authentication Options

☐ Enable Login with Forms Authentication

OTP Settings

* OTP Notification Type: None

* OTP Expiry Time: 5

☒ **Enable Login with SAML Authentication**

Use SAML Configuration Tool for configuring identity provider.

Save

In addition to enabling the Login with SAML Authentication within PAL Configuration, the connection with the identity provider must be configured on the application server.

3.6.2 Identity Validation Options

If a request type within AX is configured to require proof of identity, requesters are forced to submit a proof of identity form. A Proof of Identity and Consent form can be found on every submitting Agency website. A hyperlink to the Agency's Proof of Identity and Consent form can be hosted within the request submission form. Per *OMB M-21-04*, Agencies must be willing to accept this form in electronic format as sufficient proof of identity. Once completed and saved, this authentication form can be uploaded in the *Proof of Identity* attachment workspace in the PAL Submission Form.

If the *Digital Authentication* radio button is selected, a link appears and redirects the requester to Login.gov to login with existing credentials or to create a new user profile. An IAL1 (Username and Password) login is not sufficient to authenticate a requester identity. To provide digital authentication, Login.gov will require an IAL2 profile and will assist the requester with the process of providing their user authentication information. After the requester submits their information, they receive a security code via email or authentication via phone. After successfully completing their validation, the requester is returned to the request submission page, which now has the Proof of Identity validated and will share the validation with the agency upon request submission.

Request Information (Header)		New request Information	...				
Description Document	Description Document	...		<input type="checkbox"/>	<input checked="" type="checkbox"/>		
* Description	Description	...		<input type="checkbox"/>	<input checked="" type="checkbox"/>		
Date Range for Record Search	Date Range for Record Search	...		<input type="checkbox"/>	<input checked="" type="checkbox"/>		
Proof of Identity/Consent (Header)		Proof of Identity/Consent	...				
Proof of Identity Mode	Verification Mode	...				Proof of Identity Option	Upload Attachment/C
Consent	Consent	...		<input type="checkbox"/>	<input checked="" type="checkbox"/>		Upload Attachment
Proof of Identity	Proof of Identity	...		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>		Upload Attachment/Digital Authentication
Digital Authentication	Digital Authentication	...		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>		

If one of the above Proof of Identity methods is satisfied, the system permits the requester to complete submission of a request.

After a request is received from PAL, the *Request Information* tab features the *Proof of Identity/Consent* workspace, which displays the date the requester's identity validation was received, as well as any attachments provided during request submission. If the request is received via any other submission method, the proof of identity section in AX can be manually updated with the received date and required attachments. If the required information is not provided, the AX requester can use PAL Messages, Email, and/or Letter Templates to request this required information from the requester and stop the clock until Proof of Identity validation is received.

Typically, organizations will satisfy identity requirements using Username and Password or IAL1. If an organization will only be using the application to process ATIP Requests and they do not require proof of identification, they only need to utilize IAL2.

(!!) Note: For more information about how proof of identity solutions authenticates a requesters identity or how to partner with an identity proofing solution, visit the solutions providers website (Login.gov or ID.me).

3.7 Email Templates

Certain events in PAL trigger an email notice sent to a requester or the ATIP office. These email notices are created from email templates, which represent the automated messages that are sent from PAL. Users with sufficient privileges are able to update the subject and body of the template to suit their agency's requirements.

1. Click **Email Templates**.
2. Select the type of template from the available list. For an explanation of each template, click the **Question Mark** button.
3. Make any necessary modifications to the subject or body of the template using the available tools provided by the Editor program and preset fields found on the **Insert Fields** menu.
4. Click **Save** to retain the edits to the template.

Setting Up the PAL Application

Email Templates Configuration
*Please complete all the required fields marked with an asterisk(*).*

Template:

Body*

Dear [REQUESTER_FIRSTNAME] [REQUESTER_LASTNAME],

Option 1 : [REQUESTER_MYACCOUNT] Active

An existing profile with '[REQUESTER_EMAIL]' has been located. Therefore a temporary password has been issued and sent to the email address provided. Upon successful login it is recommended that you go to [REQUESTER_MYACCOUNT] via the left panel to review/update your personal profile since registration information was not accepted because the existing profile was located. Please check your email for this temporary password and return to [APPLICATION_URL] to login. adsasdasd

Option 2 : [REQUESTER_MYACCOUNT] Inactive

An existing profile with '[REQUESTER_EMAIL]' has been located. Therefore a temporary password has been issued and sent to the email address provided. Please check your email for this temporary password and return to [APPLICATION_URL] to login. Upon successful login it is recommended that you contact the FOIA Office at [ENTERPRISE_PHONE] to request an update to your requester profile.

Kindly change the password provided by us.

Regards,
[ENTERPRISE_NAME]

3.8 Email Log

The Email Log tracks messages sent from PAL and is used for reporting and administrative purposes. Administrators are able to view and print a report of all messages sent based on search criteria.

3.8.1 View & Export

Follow the steps below to view and export items from the email log:

1. Navigate to **Administration > Jobs**.
2. Click **Email Log**.

3. Enter search criteria based on the available fields, as described below the following image:

Email Log Information

Template: All ▼

Sent To (Email Address): *

Requester's First Name: *

Requester's Last Name: *

Status: All ▼

(!!) Note: Users are not able to download the Email Log if they are using a secured environment.

3.8.2 Clear Log

Follow the steps below to clear the email log:

- Navigate to the *Email Log Information* screen and click **Clear**.

Email Log Information

Template:

Sent To (Email Address):

Sent Date: From: To:

Search **Clear**

- The system displays a confirmation message, asking if the user would like to export the log prior to clearing it.
 - To export the log, click **OK** and follow the steps as outlined in the previous section ([View & Export](#)).

- b. Click **Cancel** to proceed without exporting.

3. After clicking **Cancel** the system displays a verification message, confirming you'd like to clear the log. Click **OK**.
4. After clicking **OK**, the log is automatically cleared. If you selected to export the log, it is automatically downloaded after starting the clear process.

3.9 Users

Provisioned PAL users are managed from the *Users* screen, as shown below:

- General Settings
- Enterprise
- Modules
- Web API
- Security
- Email Templates
- Email Log
- Users**
- Audit Log
- Requester Fields
- Request Fields
- Appeal Fields

Search

To execute an audit log search:

1. Login to the PAL Configuration page using the administrator account. Click **Audit Log**.

2. The *Audit Log* page appears. Select the desired **Activities** radio button.

(!!) Note: Selecting an Activities radio button may change the Audit Objects listed in the workspace.

3. Select the desired **Audit Object** from the list.
4. Select the **Administrator(s)** from the drop down list.
5. Select the **Requester Login Date Range** radio button.

(!!) Note: The Requester Login Date Range radio button selection may change the type of Date Range inputs. This procedure uses date picker fields.

6. Complete the **Select Date Range** inputs.
7. Click **Search**. The page refreshes to display results matching the search criteria. Within the search results page you can print or export the results.

After a search has been executed, the application returns results in the format captured in the image below. The pictured search has returned search results to display the following information:

- Action Taken By
- Action Time

3.11 Requester Fields

The *Requester Fields* screen allows administrators to control which fields are presented to a requester when creating a profile. Fields with a red asterisk (*) are mandatory and must be completed. These fields are not editable and are read-only. Fields with a drop-down list can be configured to have a standard value.

1. Click **Requester Fields**.
2. Indicate the **Required** and **Visible** fields and **Default** values based on your agency's requirements.
3. Enter **Tooltip** information, if required.

(!!) Note: Tooltip information are prompts that users can view when seeking additional information about a field or selection.

4. Click **Save**.
5. A verification message appears. Click **OK** to retain the settings.
6. Click **Refresh** to reload information on the screen.

Setting Up the PAL Application

Non PAL Request Status Information

1. Select the desired options for the *Request Status Information*. This section allows administrators to control which fields are available when checking the status of a submitted request, if the requester is registered or not. Fields that are grayed-out cannot be modified and are the default fields displayed on the *Request Status* screen. The total width of the displayed fields must equal 100%.

Setting Up the PAL Application

Note: The requester will only be able to see the following columns after signing into the PAL application (Request Description, Fees Due, and Download Documents).			Total		100	100

- Indicate whether or not to **Enable Non PAL Requests Status Information**. This option allows requests submitted to the ATIP office via mail, email, or fax to be tracked online by PAL users that do not have registered profiles.

Non PAL Request Status Information
☒ Enable Non PAL Requests Status Information
Note: Requester will be able to see the Request Status information even if they are not registered with PAL.

- Indicate whether or not to display **Verification Fields while checking the Request Status information without registering**. This option allows requests submitted to the ATIP office via mail, email, or fax to be tracked online by PAL users that do not have registered profiles, by requiring the case tracking number, requester last name and characters displayed in the distorted image to ensure the request was not submitted by a computer. Non-registered users will have restricted access to fee information and responsive records.

Verification Fields while checking the Request Status information without registering
☒ Enable Last Name
☒ Enable Captcha

- Indicate whether or not to **Show Requester Details on Request Submission Form**. This option displays the *Requester Details* section with contact information of the registered requester.

Requester Information
☐ Show Requester Details on Request Submission Form

- Indicate whether to **Send Email Notification to Requester**. This option enables automated notifications sent to the requester when the request is updated to the selected status (es).

The screenshot shows a configuration window titled "Send Email Notification to Requester". It contains a list of checkboxes for selecting email notification events. The first checkbox, "Send Email Notification of Payment Due to Requester", is checked. The other checkboxes are unchecked. At the bottom, a red note states: "Note: Request Status Update Notification will be sent to the Requester when the status of the request is updated".

Send Email Notification to Requester	
<input checked="" type="checkbox"/>	Send Email Notification of Payment Due to Requester
<input type="checkbox"/>	Send Email Notification to Requester when status is updated
<input type="checkbox"/>	Received
<input type="checkbox"/>	Assigned for Processing
<input type="checkbox"/>	In Process
<input type="checkbox"/>	On Hold - Need Info/Clarification
<input type="checkbox"/>	On Hold - Fee Related
<input type="checkbox"/>	On Hold - Other
<input type="checkbox"/>	Invalid Reference Number (Appeals Only)
<input type="checkbox"/>	Documents Delivered (This notification will only be delivered if documents are delivered to PAL)
<input type="checkbox"/>	Closed

Note: Request Status Update Notification will be sent to the Requester when the status of the request is updated

6. Click **Refresh** to reload the original settings.
7. Click **Save** to retain the settings. A verification message appears.
8. Click **OK** to accept the settings and close the message window.

3.15 Reading Room

3.15.1 Reading Room Fields Configuration

To access documents in the reading room, requesters must first perform a search. The *Reading Room* screen contains the searchable fields requesters need to complete to retrieve documents.

1. Click **Reading Room**.
2. Indicate the **Reading Room Fields** you want to be visible in the application.
3. Enter any **Tooltip** information, if required.
4. Accept the default value for the **Number of Views Constitutes a Popular Document** or enter a value. This value represents the number of times a document is viewed before it is considered popular or a frequently requested document.
5. Indicate whether you want to **Display PAL Reading Room Search Screen** for popular documents. This option displays the search screen for the *Reading Room Popular Documents* section in the application. The search information displayed is the same as the information configured for the Reading Room. In order to view the search screen, the **Reading Room Popular Documents** label must be enabled in the *Main Menu Links Configuration* screen.
6. Indicate whether you want to **Enable Content Search**. This option displays the **Content Search** field in the reading room and popular documents search screens. This feature allows users to find a specific string of characters, words, or phrases.

Setting Up the PAL Application

Keyword	Keyword		<input type="checkbox"/>	<input checked="" type="checkbox"/>	

3.15.2 Remote Content Search

The Content Search for the PAL Reading Room can be configured to exist on a separate file repository from the application server. Follow the steps below to enable remote content search:

1. Enable content search per the instructions in the previous section.
2. Create a share folder (UNC path) for PAL Reading Room documents.
3. Add the PAL application pool account to the UNC path created in the previous step, including *Modify* permissions.

(!!) Note: If the PAL website is running with the *Network Service* account, add the system account (domain/computer name\$) to the UNC path, including *Modify* permissions.

4. Update the path in the *Reading Room* tab under *PAL Configuration*.

3.16 Reading Room Documents

3.16.1 Search Reading Room Documents

The Reading Room Documents search configuration allows you to search for documents added to the Reading Room. To search existing Reading Room documents:

1. Click **Reading Room Documents**. The *Search for Documents in Reading Room* screen appears as shown below:

Search for Documents in Reading Room

[Spell Check](#)

The Access to Information Act, (R.S.C., 1985, c.A-1), requires that certain documents of interest to the general public be published electronically. [ATIA Agency] is making these documents available to the general public in electronic form.

Search for Documents in Reading Room

Show in Reading Room : ☒

Never Expires : ☒

Comments :

- Enter the required elements outlined in the table below.
- Click **Save** when completed.

Field Name	Description
Folder Name	The title given to the document.
Reading Room File Cabinet	Reading Room File Cabinet where the document should be uploaded. Select from the listed options.
Browse Document	Allows the users to locate the file from their local/network drive. The acceptable file formats are PDF, TIFF, ZIP, DOC, XLS, DOCX and XLSX.
Number of Pages	Indicates the size of the document (in pages).
Published Date	Indicates the date the document was published to the Reading Room. Today's date is the default.
Show in Reading Room	Indicates if the document is available in the Reading Room.
Never Expires	Indicates whether or not the document remains in the Reading Room. If unselected, the Administrator is able to determine the date the document expires.
Comments	A brief narrative describing the document.
Refresh	Reloads the screen to its original settings prior to saving.
Back	Returns to the previous screen.

3.17 Display Order

This screen allows administrators the ability to determine the order for **Request**, **Requester**, or **Reading Room** section headers and fields in the application.

1. Click **Display Order**.
2. Select the desired **Module** from the drop down list.
3. Accept the default option to **Configure Headers** or select **Configure Fields**.
 - a. The **Headers Display Order** list updates to display only headers based on the selected module.
 - b. The **Fields Display Order** field is revealed when the **Configure Fields** option is selected and automatically adjusts to display fields based on the selected module and header.
4. Use the **Up** and **Down** arrows to reposition the headers and/or fields.
5. Click **Refresh** to reload the screen with the default settings.
6. Click **Save** to retain the settings.

3.18 Dashboard Administration

This link launches the **Dashboard Administration** application. Please refer to the *PAL Dashboard User Manual* for further information concerning this link.

3.19 Online Payment

The online payment option is used to configure the integration between the PAL and an agencies' existing online payment solution (i.e. Pay.gov). When the *Enable Online Payment* option is checked, the drop down list includes the name of the integrated PAL online payment solution and, upon selection, displays the configuration fields required to communicate between PAL and the payment solution.

The online payment integration provides the ability for agencies to require payment prior to accepting a request submission and/or providing requesters a method of submitting payment for charges billed to them related to their record request.

In addition, the information the requester sees on their receipt (as triggered by the application) is also configured here. Follow the steps below to configure Online Payments:

(!!) Note: Each PAL integration is different, so different fields may be available for configuration purposes.

1. Click **Online Payment**.
2. Select the **Enable Online Payment** checkbox to enable the online payment option for your PAL.
3. Under the *Payment Option* drop down list, select the **Payment Option** to enable for PAL. These options are based on the integrated payment solution(s) you have connected to your ATIPXpress application.
4. After selecting an available **Payment Option**, additional configuration fields appear to configure the selected payment method.

(!!) Note: The screen below is presented as an example. The fields shown here may not apply to your online payment configuration.

Setting Up the PAL Application

Note: When no Sub Link is selected, default option is 'Check Request Status without registering'.

Save

Refresh

Note: The alphabets O,C,N and K are already being used as Access Keys in the PAL Application.

4. To access additional options to open a link:
 - a. Select the checkbox next to a label name. The **Open In** drop down list becomes available.
 - b. Click the drop down list and select **Right Panel** to display the link on the right panel or **New Window** to launch a new window when the link is selected.

(!!) Note: Although Administrators have the option to specify an alternate location for opening links, it is not recommended to do so. Keeping the links in the main menu makes it easier for users to navigate within the application.

3.21 Enabling Links

Administrators are able to determine whether or not a user must be registered in order to submit a request or an appeal and when the **Submit Request**, **Submit Appeal**, **Request Status** and **Appeal Status** links should appear in the application.

1. Select the desired options based on the information outlined in the table below, as per your agency's requirements.
2. Click **Refresh** to load the screen with the default settings.
3. Click **Save** to retain the updated settings.

Field Name	Description
Enable Request Link	Determines when to display the Submit Request link. If Always is selected, the link displays at all times. If Only after Sign In is selected, the link displays after the user successfully completes registration.
Enable Appeal Link	Determines when to display the Submit Appeal link. If Always is selected, the link displays at all times. If the Only after Sign In radio button is selected, the link displays after the user successfully completes registration.
Enable Request Status Link	Determines when to display the Request Status link. If Always is selected, the link displays at all times. If the Only after Sign In radio button is selected, the link displays after the user successfully completes registration.

Field Name	Description
Enabling Sub Links (When Requester is not logged in):	This option becomes enabled if Always is selected as the preferred method to display any of the above links. Administrators can opt to have all or some of the sub links appear. By default, selecting the <i>Check Request Status without registering link</i> checkbox appears in the <i>Request/Appeal Status</i> screen if no sub links are selected.

3.22 Layout Settings

This screen provides guidelines for administrators to customize the appearance of the PAL application theme. Administrators can select one of several predetermined themes, or they can customize their own theme using a custom style sheet.

3.22.1 Standard Theme

The PAL configuration offers several out-of-the-box themes to easily select and apply. Follow the steps below to use a built-in theme.

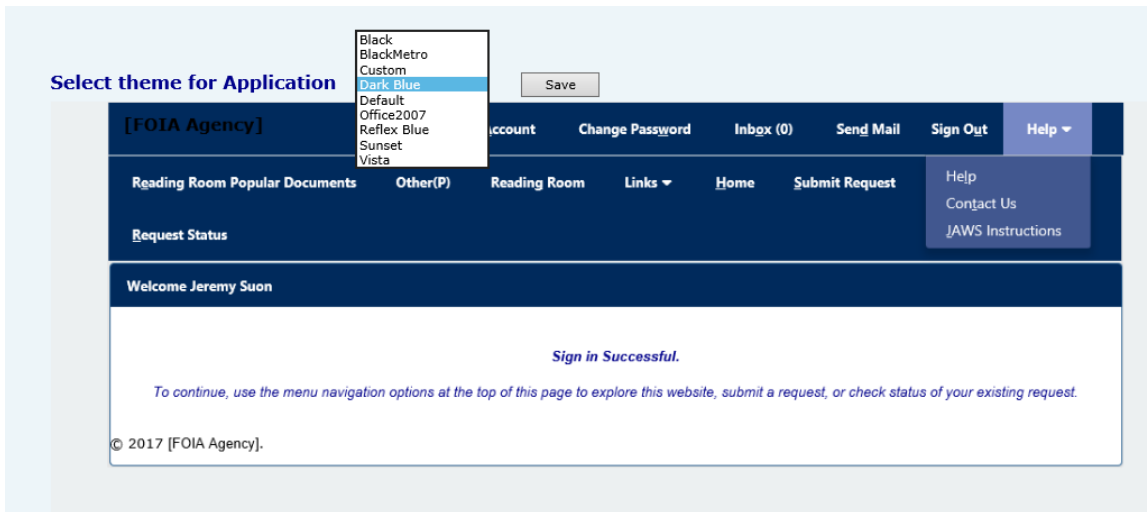

1. Click **Layout Settings**.

Setting Up the PAL Application

2. Select the theme to apply from the *Select theme for Application* drop down list.

3. If satisfied with the selected theme, click **Save** to apply the changes to the application.
4. A confirmation message displays. Click **OK**.

3.22.2 Custom Theme

You have the option to customize your own theme using a Cascading Style Sheet (CSS) file. You'll first download the *Custom.css* file, then edit the contents as needed in order to customize the look and feel of your application. Follow the steps below to design a custom PAL theme.

(!!) Note: You will need a working knowledge of CSS in order to create a custom PAL theme.

1. Click **Layout Settings**.
2. Select **Custom** from the *Select theme for Application* drop down list.
3. After selecting **Custom**, buttons will appear with options to **Save** or **Download**. Click **Download** to save the *Custom.css* file to your local drive

(!!) Note: This file must keep the name *Custom.css*. If the name is changed, PAL will not be able to read the file and apply custom settings.

- Open the Custom.css file, and edit the style sheet file as needed to apply a custom theme. You will need a working knowledge of CSS in order to fully customize the style, however a basic guide is included on the *Layout Settings* screen with examples of where and how the CSS file should be edited to produce the desired results. A sample of the *Main Menu* customization options are shown below.

- When you have configured your Custom.css file and are ready to apply the layout updates, navigate to **Layout Settings** and select the **Custom** theme from the *Select theme for Application* drop down list.

Browse... Upload

Select theme for Application Custom Save Download

- Click **Browse**, and navigate to and select the **Custom.css** file to upload.
(!!) Note: This file must be named Custom.css. PAL will not accept a custom theme with any other name.
- The file path for the selected file appears. Click **Upload** to upload the custom CSS file.
(!!) Note: After a custom theme has been uploaded, you can download this custom style sheet file by clicking Download.
- Click **Save** to apply the customized theme to your PAL application.
- A confirmation message appears. Click **OK** to close this window and complete the updates to the layout settings.

3.23 Messages

Messages Configuration provides a means for administrators to customize content on various screens within the PAL application. Additionally, the header and footer can be customized to suit your agency.

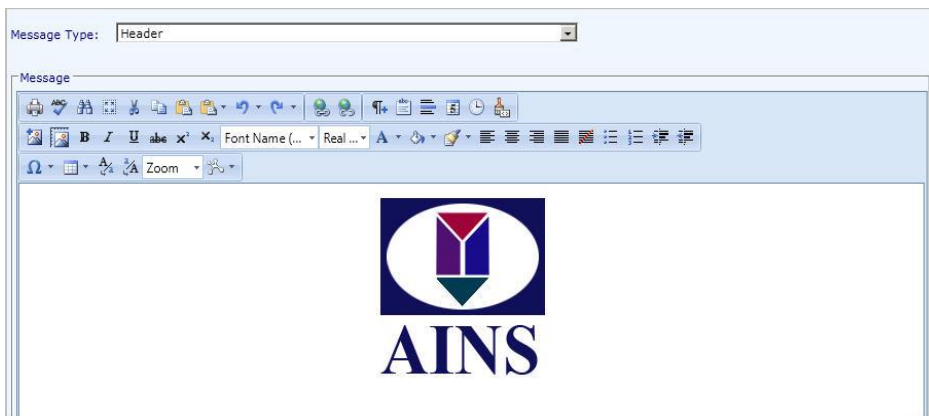

- Select a **Message Type** from the *Message Type* drop down list.
- Add or modify content based on agency requirements using the available tools provided by the Editor program.

3. Click **Save**. A verification message appears.
4. Click **OK** to accept the content and/or settings.
5. Repeat steps 1 – 4 for each message to configure.

(!!) Notes:

- The Help message displays the PAL Configuration online manual, and is used by administrators as a reference. The information on this screen is provided by OPEXUS and should not be altered.
- You must reboot the application server or reset IIS to update the content and settings reflected in the application.
- If your system is configured with more than one server, e.g. load balancing servers, make sure messages are configured on both servers.

The table below provides a brief description of the default request types that a requester can submit.

REQUEST TYPE	DESCRIPTION
Appeal	A petition to reexamine the initial request if the response is not satisfactory to the requester and/or if the requester disagrees with the amount of fees charged, withholding of information, or believes that there are additional records responsive to his request that have not been located.
Consultation	When an agency locates a record that contains information of interest to another agency, it will ask for the views of that other agency on the disclosability of the records before any final determination is made.
FOIA	A request made to an agency in accordance with the provisions stated under the Freedom of Information Act (FOIA).
FOIA/PA	A request or petition made by the general public in accordance with FOIA and also supported under the Privacy Act.
Litigation	A petition for judicial review if an appeal was not satisfied.
PA	A request type, under which a request is submitted in accordance with the guidelines given under the Privacy Act, is known as a PA request type.

Fees are charged towards:

Document Reproduction: Fees charged to recover the cost of copying documents. A Requester is usually charged the actual cost of copying computer tapes, photographs and other nonstandard documents.

Search: Fees imposed to recover the costs of searching for documents that includes the time FOIA analysts spend searching for material responsive to a request.

3.24 Change Password

There may come a time when it is necessary to change the Administrator's password. The *Change Administrator's Password* screen allows authorized users to create a new password for the PAL Configuration application.

(!!) Notes:

- The Password Policy created in the Security module must be followed in order to successfully change the password.
- Changing the password will affect access to the Dashboard Administration application.

Follow the steps below to change the Administrator password for PAL:

1. Click **Change Password**.
2. Enter the **Old Password** in the *Old Password* field.
3. Enter the **New Password** in the *New Password* field.
4. Re-enter the **New Password** in the *Confirm Password* field.
5. Click **Submit**.

3.25 Reset a Requester Password

If a requester has requested a password reset, complete the following:

[FOIA Agency]	My Account	Change Password	Inbox (0)	Send Mail	Sign Out	Help ▾
Dashboard	Reading Room Popular Documents	Other(P)	Reading Room	Home	Submit Request	Submit Appeal
Request Status						

1. If you have received requester password reset request, login to the *PAL Configuration* page.
2. Login using the administrator login and password.
3. Click Reset Requesters Password. The Search Requester to Reset Password screen appears.

Reset Requester's Password
At least one field is required.

Search Requester to Reset Password

Display privacy disclaimer on the below pages

☐ Top

☒ bottom

☐ Check All

☒ My Account

☐ Request

☐ Appeal

5. Select the display options for the **Login Page Disclaimer** (**Banner**, **Organization Name**, or **both**). Selecting any one of these items automatically populates the **Priority Order** field.
6. Enter **Login Page Disclaimer Text** based on your agency's requirements. The **Disclaimer** option automatically appears in the **Priority Order** field once text is entered.
7. Use the **Up** or **Down** arrows to select the **Priority Order** of the items to appear on the **Login** screen.

The screenshot displays the configuration interface for the PAL Application. It is divided into two main sections: 'Login Page Disclaimer' and 'Warning Banner'.

Login Page Disclaimer Section:

- There are two checkboxes: 'Banner' and 'Organization Name'. Both are currently unchecked.
- Below the checkboxes is a text area labeled 'Disclaimer Text'.
- Below the text area is a 'Priority Order' section. It contains a list box with 'Login Details' selected, and up/down arrow buttons to its right.

Warning Banner Section:

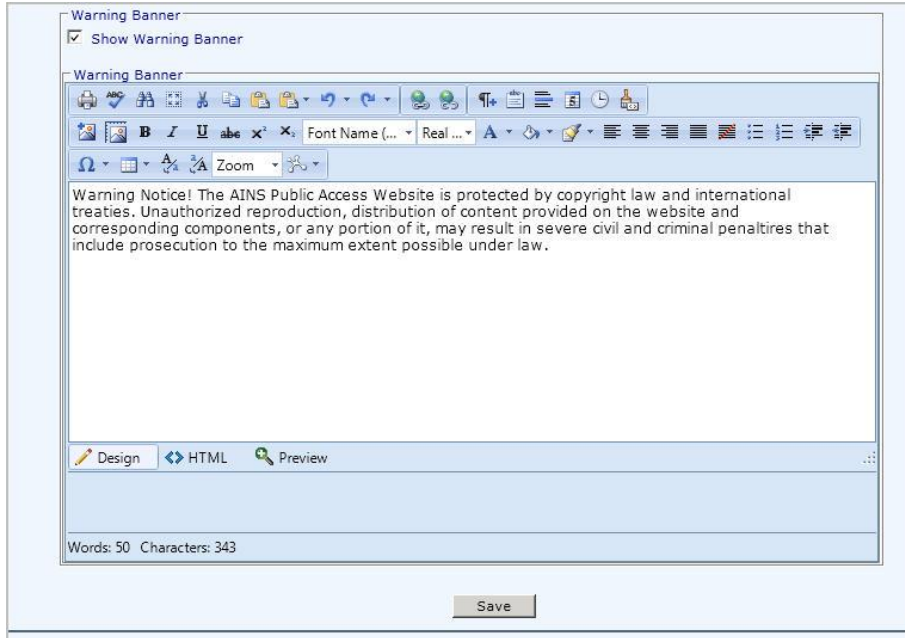

- There is a checkbox labeled 'Show Warning Banner', which is currently unchecked.
- Below the checkbox is a rich text editor labeled 'Warning Banner'. The editor shows a toolbar with various formatting options (bold, italic, underline, font color, background color, etc.) and a text area containing the following text:

Criminal actions, as well as fines or other penalties. In accordance with Federal Regulations, employees have a duty to protect and conserve Government property and shall not use such property, or allow its use, for other than authorized purposes.

To ensure that this service remains available to all users, this federal government computer system is continuously monitored. Information retrieved may be disclosed for any lawful purpose, including the management and maintenance of the system, to ensure the system is authorized to facilitate protection against unauthorized access, and to verify security procedures, survivability, and operational security. Use of this system by any user, authorized or unauthorized, constitutes express consent to this monitoring. All users of this system are advised that if such monitoring reveals evidence of possible abuse or criminal activity, such evidence may be provided to appropriate law enforcement officials. Except for authorized law enforcement investigations, no other attempts are made to identify individual users or their habits.
- At the bottom of the editor, there is a status bar showing 'Words: 248 Characters: 1688'.

8. Select the option to **Show Warning Banner**, if required.
9. If the Warning Banner is displayed, enter the **Warning Banner** text based on your agency's requirements using the Editor program.

Setting Up the PAL Application

10. Click **Save** to retain the settings.

3.27 Error Log

The Error Log provides details to help identify problems and for troubleshooting issues that may arise while using the PAL application.

1. Click **Error Log**.
2. Click **Clear** to remove the Error Log contents. Make any desired alterations to the Error Log display.
3. Click **Save** to store a copy of the Error Log to your local or network drive.

4 Sign Out

Click the **Sign Out** link on the left panel to exit PAL Configuration application and return to the login screen. A verification message appears. Click **OK** to continue signing out or **Cancel** to abort exiting the application.

(!!) Note: It is necessary to sign out and reboot the server or reset IIS in order to have the configurations reflected in PAL.

5 Release Notes

This screen provides a list of Release Notes for PAL. Release notes are communication documents shared with customers and clients of OPEXUS, and they detail the changes or enhancements made to the features of PAL. The number of documents varies depending on the type of installation performed. If you have a new installation of PAL, release notes for version 10.1 and above are displayed. However, if PAL was upgraded from one version to another, users may see earlier versions of release notes. Click the document link to open or save a copy to your local/network drive.

6 Inserting an Image

The instructions in this section assist administrators in the event images must be inserted into messages such as in the *Header*. The recommended file types for images are JPG or JPEG.

1. Add the image(s) to the C:\inetpub\wwwroot\PublicAccess Link\Pal\images folder.

2. Click **Add Image** within the Editor's toolbar. The *Picture* window appears.
3. Enter the URL for public use in the **Picture Source** field. (This is not the PAL Configuration URL.)
 - a. For example, <https://hudpal.eATIP-host.com>
4. Add a forward slash and the word "images".
 - a. For example, <https://hudpal.eATIP-host.com/images>
5. Add a forward slash and the name of the image to insert into a message. This must be one of the images copied into the location in Step 1.
 - a. For example, <https://hudpal.eATIP-host.com/images/testimage.jpg>.
6. Click **OK**. The image is inserted into the message.

7 Troubleshooting

Issue	Resolution
PAL Reading Room documents published as .TIF files are not having OCR correctly performed, and the content is not returned in matching search results	<p>To resolve the issue, follow these steps.</p> <p>(!!) Note: To follow these steps, use the Local Group Policy Editor. To use the Local Group Policy Editor, you must be logged on to the computer by using an account that has administrative permissions.</p> <ul style="list-style-type: none">• Press the Windows key + R to open the <i>Run</i> window.• Type gpedit.msc, and press Enter.• Under <i>Computer Configuration</i>, expand Administrative Templates.• Expand Windows Components, expand Search, and click OCR.• Double-click Force TIFF IFilter to perform OCR for every page in a TIFF document.• In the dialog box that opens, click Enabled, and click OK.• Rebuild the Index.
