Version History

Date	Description
9/30/2024	Original release for v11.8.0
10/8/2024	Added ID# 82230

Bug Fixes

ID	Description
65871	Fixed a bug in the PAL Reading Room where published folders larger than 2.2 GB could not be fully downloaded. Files this size and larger can now be successfully downloaded.
70249	We updated the messages displayed during the password reset process, which did not accurately reflect the next steps. The message now correctly reflects that users should expect an email with a link they can use to recover their password.
71019	Fixed an issue where attachments added to a PAL request could not be deleted if the attachment filename contained a space character. These attachments can now be deleted as expected.
73000	Resolved an issue where the insert fields for PAL password link (used in correspondence) were not configurable and did not generate a clickable link.
82230	Fixed a security vulnerability that potentially allowed unauthenticated users to validate PAL user emails and submit requests or appeals on behalf of others.
