eCASE 11.1.1 Release Notes

Notice of Rights

Copyright © 2023, AINS, LLC d/b/a OPEXUS. All rights reserved. No part of this publication may be reproduced, transmitted, transcribed, stored in a retrieval system, or translated into any language, in any form or by any means, electronic, mechanical, photocopying, recording, or otherwise, without prior written permission of the publisher: AINS, LLC. For information on obtaining permission for reprints and excerpts, contact info@opexustech.com.

Additionally, all copyrights, confidential information, patents, design rights and all other intellectual property rights of whatsoever nature contained herein are, and shall remain, the sole and exclusive property of the publisher.

Notice of Liability

The information in this publication is believed to be accurate and reliable. However, the information is distributed by the publisher (AINS, LLC.) on an “As Is” basis without warranty for its use, or for any infringements of patents or other rights of third parties resulting from its use.

While every precaution has been taken in the preparation of this publication, neither the author (or authors) nor the publisher will have any liability to any person or entity with respect to any loss or damage caused or alleged to be caused, directly or indirectly, by the information contained in this publication or by the computer software and hardware products described in it.

Notice of Trademarks

The publisher’s company name, company logo, company patents, and company proprietary products are trademarks or registered trademarks of the publisher: AINS, LLC. All other trademarks or registered trademarks are the property of their respective owners.

Non-Disclosure Statement

This document’s contents are confidential and proprietary to AINS, LLC. This document cannot be released publicly or outside the purchasing agency without prior written permission from AINS, LLC.

Images in this manual are used as examples and may contain data and versioning that may not be consistent with your version of the application or information in your environment.

Additional Notice

Information in this documentation is subject to change without notice and does not represent a commitment on the part of AINS, LLC.

Notwithstanding any of the foregoing, if this document was produced as a Deliverable or other work for hire under a contract on behalf of a U.S. Government end user, the terms and conditions of that contract shall apply in the event of a conflict.

eCASE 11.1.1 Release Notes

Product Enhancements

We've made numerous enhancements to eCASE for version 11.1.1. See the table below for features and improvements you can look forward to in the latest version of eCASE:

ID	Feature	Description
29923	Insert Fields Available in Word-Based Letter Templates	<p>Rich Text field values can now be displayed with the established styling in a Letter Template. When creating or editing the Letter Template in Word, you must use the MergeField option (found under Insert > Quick Parts > Field > MergeField) to carry the formatting over from the application.</p> <p>Note: This does not apply to table styling</p>
25667	Filter on Folder Status and Task Status	<p>In the Folder Search screen, you can now filter on the Folder Status and Task Status columns using your organization's specific terminology. To use these filters, enter your terminology in the search field for either the Folder Status or Task Status columns.</p>
27914	Search Fields When Adding/Editing Permissions	<p>We added a search bar to the Field Security permissions page in eCASE Administration, allowing administrators to search for fields to adjust that field's security settings. When searching for specific fields, any matches are automatically filtered in the column.</p>

ID	Feature	Description
33471	TimeXpress Configuration Settings	<p>We've added two options in TimeXpress <i>General Settings</i>:</p> <ul style="list-style-type: none"> • Enable Leaves: If unchecked, users will not see the "Apply/View Leave" and "Approve/Deny Leave" buttons in TimeXpress. • Enable Project Management: If unchecked, users will not see the "Project Management" button in TimeXpress.

Bug Fixes

We've addressed some issues identified by our customers as well as our OPEXUS team. These bug fixes are outlined in the table below.

ID	Description
16755	When viewing Folder Roles and a role is granted all Contact related permissions, this is now listed as "All for Contact" rather than listing out each Contact permission.
28230	Fixed an issue where Application Reports that were marked as "Hidden" still appeared in the Reports List. Hidden Application Reports no longer appear on the Reports List however these can still be run from a user's Favorites if present.
32682	Fixed a reported issue where PDF files were corrupted within the Online Editor, preventing the PDF from being opened in either the Online Editor or using Acrobat.
30593	Resolved an issue in Responsive UI forms which prevented users from changing the height of rows in repeating tables.

ID	Description
30769	Fixed an issue on Contact forms where international phone numbers were not correctly retained in the application. Phone numbers greater than ten digits are now retained exactly as entered in the form to retain all digits and formatting.
32570	Resolved an issue where the Portal Sync job was not updating configuration setting changes from eCASE to the Portal.
30993	Fixed an issue with special characters in the large text editor, which caused the text history view to break, thus rendering the text history incorrectly.
32261	Fixed an issue where folders associated with an eCASE Contact could not be deleted, resulting in an application error.
32778	To prevent issues when exporting Crystal Reports, we added option to export Crystal Reports in Microsoft Excel (97-2003) format.
33729	Fixed an issue in TimeXpress that caused slowdown and crashes when users had a large number (30,000+) of available Tasks.
33824	In the eCASE App Designer, we resolved an error that occurred within the Condition editor when attempting to add a Request Date-based condition.
35077	Fixed an issue when reopening folders where the task status did not return to the previous state as expected.
