1 eCASE 11.2.0 Overview

At OPEXUS, we aim to create the best possible experience for our customers by making continuous improvements to our products.

In this release, we've focused on the eCASE user interface, with enhancements to the overall usability and style of the platform. This includes a new sign-in screen and password recovery process, as well as new fonts, colors, and logos to help modernize our applications. We've also added Firefox browser support, giving our users more flexibility in how they access eCASE.

2 User Interface Enhancements

In this release, you'll notice changes to the platform's look and feel. See the sections below to learn more about user interface updates for v11.2.0.

2.1 Banner Color

ID# 34004

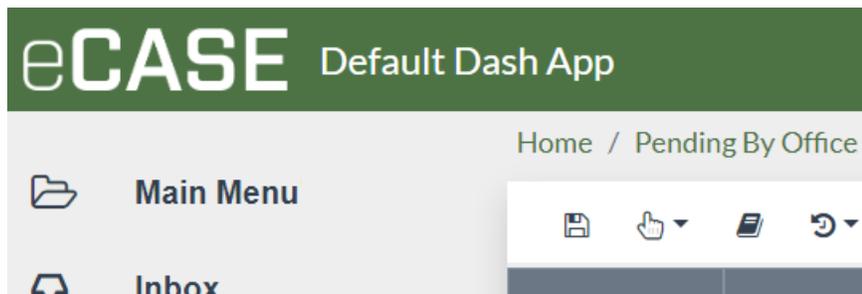

The main banner, which displays the application name, search bar, and navigation buttons, now reflects our rebranding as OPEXUS in 2023.

2.2 Font Family

ID# 34007

We updated the platform's base font family to Lato, our OPEXUS brand font. You'll see Lato used consistently across our products and documentation, and now within the eCASE platform.

2.3 Button Style

ID# 34006

We've made changes to button styling in eCASE, removing borders and corner rounding for a cleaner appearance. Button text now uses our OPEXUS brand font, Lato, and text is now bolded and centered within the button. Lastly, we updated button color scheme. Button shading now changes based on your interactions (or the button status), including the static appearance, hovering over a button, clicking a button, or if a button is disabled.

2.4 Logos

ID# 34013

We updated logos for our eCASE applications. These new logos are used throughout, including the *Sign In* page, the *About* pop-up, and more.

2.5 Links

ID# 48224

Links now display in specific OPEXUS colors to reinforce our brand identity. The shade changes when you interact with these links, or to reflect a link's status.

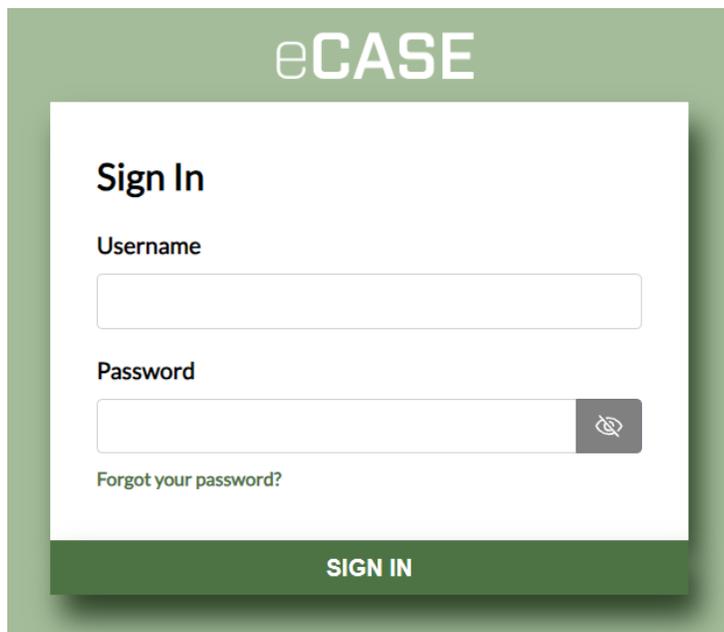

3 Sign In Updates

We've revamped eCASE sign in for this latest release, as detailed in the following sections.

3.1 New Default Sign In Screen

ID# 34043

The eCASE *Sign In* screen is all-new for v11.2.0. The screen features our new eCASE logo and color scheme, as well as the updated fonts and button styling we've added within the application.

You also have the option to **Show** or **Hide** your password as you enter it. Click the  **Show/Hide** icon to toggle the hashed (hidden) password on or off.

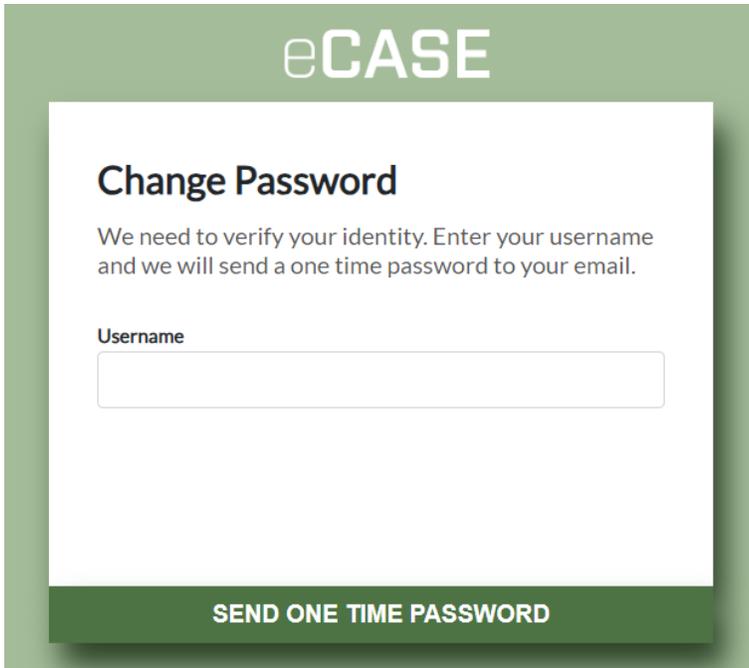

3.2 Forgot Password Flow

ID# 34044, 34045, 34046, 34047, 34048

The *Forgot Password* screens have been updated with new fonts and colors, helping to reinforce our branding and bring the experience in line with modern applications. Click the **Forgot your password?** link from the *Sign In* screen to initiate the password retrieval process.

Here you'll enter your **Username** in the field provided, then click **Send One Time Password** to send an email containing a one-time password to the email associated with that username.

eCASE

Change Password

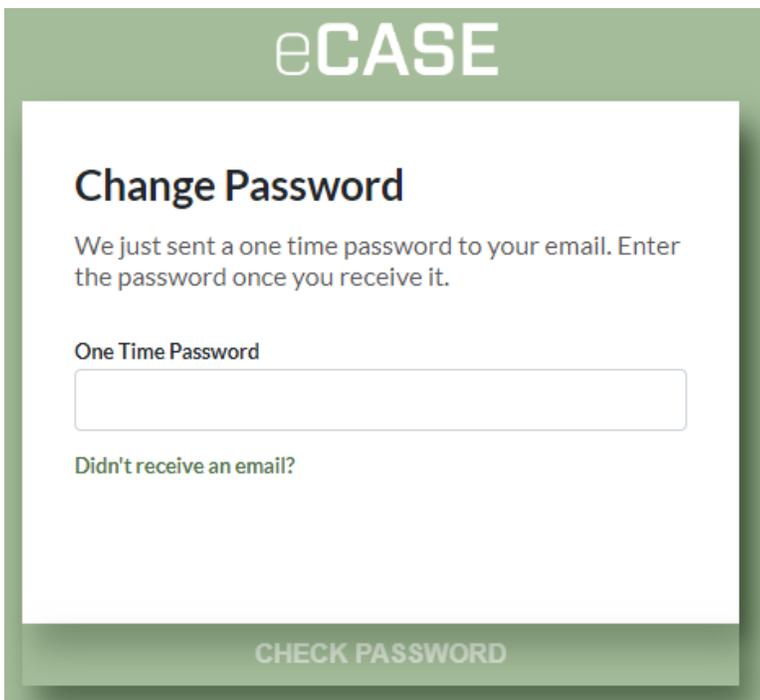

We need to verify your identity. Enter your username and we will send a one time password to your email.

Username

SEND ONE TIME PASSWORD

The Password Reset email content has also been updated. The subject line now reads “*Here’s your one time password*” and the email body includes the one time password, as well as instructions to use the password.

After clicking **Send One Time Password** the screen refreshes and you’ll be able to enter the One Time Password you received in the field provided. After entering the password, click **Check Password** to verify your one time password.

eCASE

Change Password

We just sent a one time password to your email. Enter the password once you receive it.

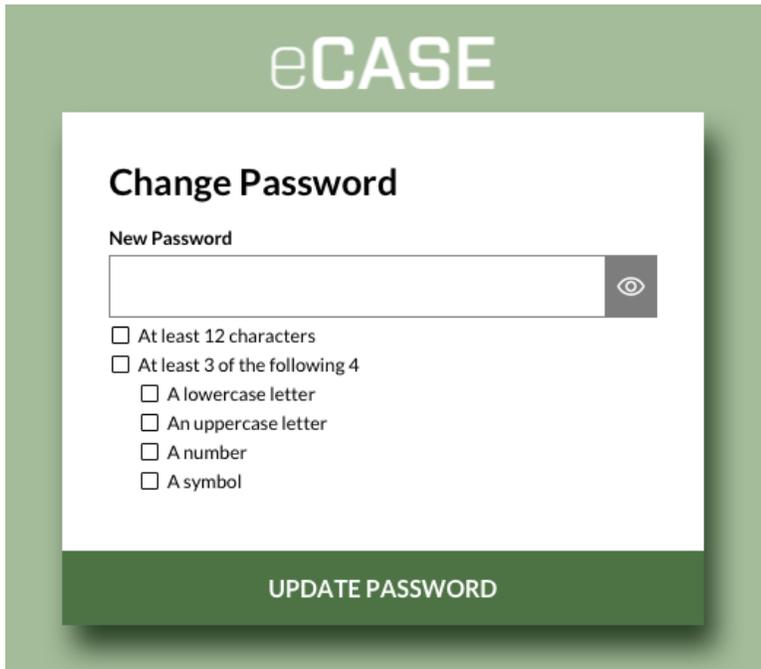

One Time Password

[Didn't receive an email?](#)

CHECK PASSWORD

After you successfully validate your one time password, the **Change Password** screen appears where you'll enter a new password. All password requirements are listed below the *New Password* field, and each requirement is automatically checked off once satisfied. When you've entered an appropriate password that meets these requirements, you can click **Update Password**:

eCASE

Change Password

New Password

At least 12 characters

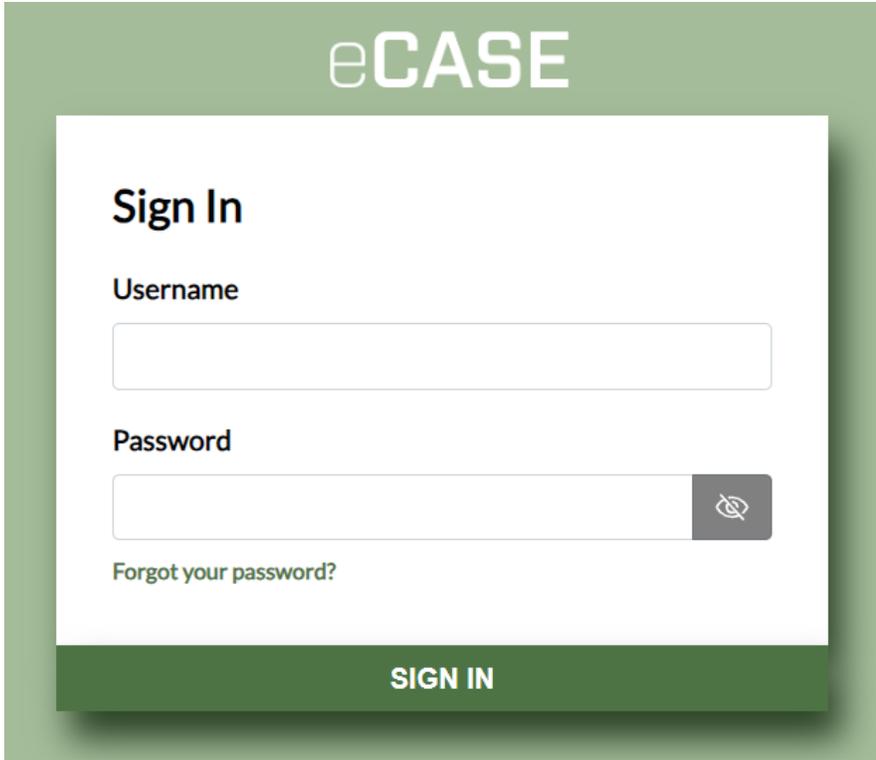

At least 3 of the following 4

- A lowercase letter
- An uppercase letter
- A number
- A symbol

UPDATE PASSWORD

After changing your password, a success message appears as shown below. You can now click **Sign In** to return to the *Sign In* screen and sign into eCASE using your new password.

The image shows a sign-in form for eCASE. The form is set against a dark green background with the 'eCASE' logo at the top. The form itself is white and contains the following elements:

- Sign In**: A large heading for the form.
- Username**: A label above a text input field.
- Password**: A label above a text input field. To the right of the password field is a small grey button with a white eye icon, used for toggling password visibility.
- Forgot your password?**: A link below the password field.
- SIGN IN**: A large green button at the bottom of the form.

4 eCASE Portal: Custom Banner Configuration

ID# 53059

We've added configuration options for eCASE Portal to enable redirects from the login/user registration page to a custom banner page. If users access the login/user registration page URL when a custom banner page is set up, it redirects to the custom banner page.

In *eCASE Portal Administration*, navigate to **Settings > General** and configure the fields as described in the subsections below. When you're finished, click **Save** to enable the custom banner page.

4.1 Enable Custom Banner

Check the *Enable Banner Page* checkbox to turn on the custom banner feature. Once the checkbox is enabled, additional *Settings* fields appear allowing you to configure the banner.

4.2 Redirect URL

The *Custom Banner Redirect URL* field allows you to configure the URL where the Portal will reroute to when the redirect is configured.

4.3 URL Referrer

The *Custom Banner URL Referrer* field allows you to configure the page that redirects to the login page. It is required when defining a custom banner page.

Custom Banner URL Referrer	<input type="text"/>
----------------------------	----------------------

4.4 Banner Content

Customize the content on the banner page content using the *Banner Page Content* rich text box. Use the toolbar to customize text font, size, and appearance, as well as the overall banner formatting.

Banner Page Content	

4.5 Custom Captcha

Once the custom banner page is configured, you can also enable a custom Captcha by selecting the *Enable Custom Captcha* checkbox. When this checkbox is selected, the standard Captcha is disabled, and you can provide the custom Captcha.

Enable Custom Captcha	<input checked="" type="checkbox"/>
-----------------------	-------------------------------------

5 Firefox Browser Support

ID# 9275, 11210

eCASE and eCASE Portal now support the use of Firefox browser (versions 91.0 or later).
