eCASE 11.3.0 Release Notes

Notice of Rights

Copyright © 2024, AINS, LLC d/b/a OPEXUS. All rights reserved. No part of this publication may be reproduced, transmitted, transcribed, stored in a retrieval system, or translated into any language, in any form or by any means, electronic, mechanical, photocopying, recording, or otherwise, without prior written permission of the publisher: AINS, LLC. For information on obtaining permission for reprints and excerpts, contact info@opexustech.com.

Additionally, all copyrights, confidential information, patents, design rights and all other intellectual property rights of whatsoever nature contained herein are, and shall remain, the sole and exclusive property of the publisher.

Notice of Liability

The information in this publication is believed to be accurate and reliable. However, the information is distributed by the publisher (AINS, LLC.) on an "As Is" basis without warranty for its use, or for any infringements of patents or other rights of third parties resulting from its use.

While every precaution has been taken in the preparation of this publication, neither the author (or authors) nor the publisher will have any liability to any person or entity with respect to any loss or damage caused or alleged to be caused, directly or indirectly, by the information contained in this publication or by the computer software and hardware products described in it.

Notice of Trademarks

The publisher's company name, company logo, company patents, and company proprietary products are trademarks or registered trademarks of the publisher: AINS, LLC. All other trademarks or registered trademarks are the property of their respective owners.

Non-Disclosure Statement

This document's contents are confidential and proprietary to AINS, LLC. This document cannot be released publicly or outside the purchasing agency without prior written permission from AINS, LLC.

Images in this manual are used as examples and may contain data and versioning that may not be consistent with your version of the application or information in your environment.

Additional Notice

Information in this documentation is subject to change without notice and does not represent a commitment on the part of AINS, LLC.

Notwithstanding any of the foregoing, if this document was produced as a Deliverable or other work for hire under a contract on behalf of a U.S. Government end user, the terms and conditions of that contract shall apply in the event of a conflict.

Product Enhancements

1.1 Field Formatting in Folder Summary Report

ID# 52108

We've changed the behavior of multi-line fields in the Folder Summary Report. These fields now accurately reflect special characters like spaces and line breaks in Folder Summary Report outputs.

1.2 Locked Attachment Behavior

ID# 55679

Incidental activity on locked attachments, such as inadvertently dragging and dropping the attachment, is no longer recorded as post-review activity. Locked attachments cannot be moved or have recorded activity once placed in locked state.

1.3 Service Pack Versioning Standards

ID# 60105

When exporting an Application Service Pack, a valid Version must be supplied. Version number must meet the following minimum standards:

- A version should have a minimum of 2 segments and a maximum of 4
- Each segment should be separated with a period
- Should only contain numbers
- Numbers cannot be greater than `int64.maxvalue`

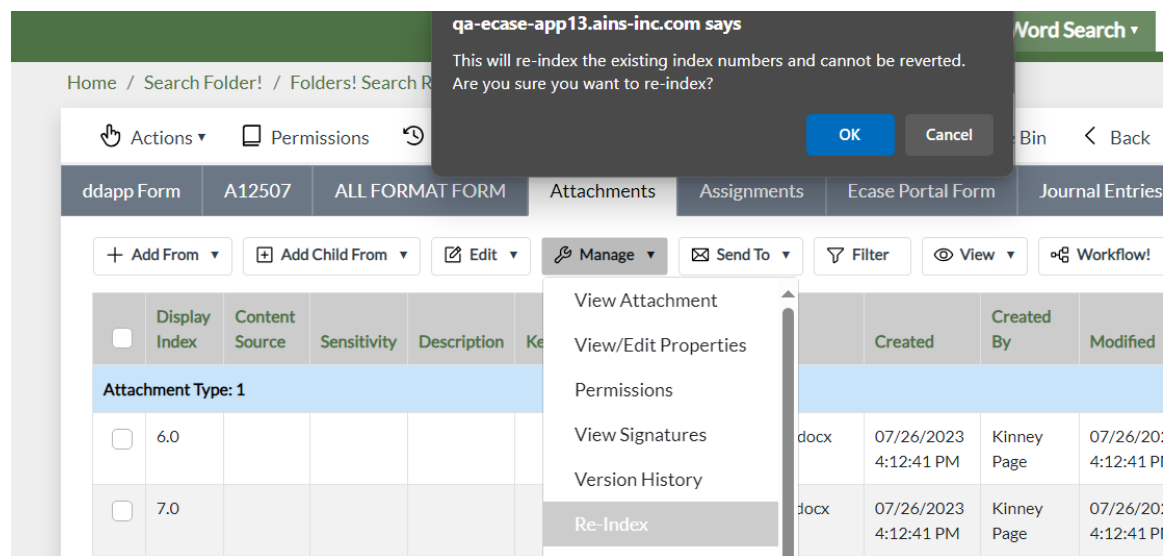

If you attempt to export a service pack that does not meet these standards, an alert appears listing the requirements. You will not be able to export the service pack until the requirements are met. Similarly, when importing an application service pack, the version must be valid, and must be equal to or later than the current version.

1.4 Re-Indexing Confirmation Message

ID# 60412

When using the Re-Index option within the *Attachments* tab (under the **Manage** menu), users are now provided with a confirmation prompt before the existing numbers are re-indexed. This alert reads “This will re-index the existing index numbers and cannot be reverted. Are you sure you want to re-index?” Users must then click **OK** to execute the re-index, preventing this action from occurring inadvertently.

1.5 Template Selection Added to Ad Hoc Assignments

ID# 61672

When making an Ad Hoc Assignment, the *Email Notification* tab now includes a drop-down to select from available pre-configured email templates. Selecting a different template automatically updates the Email Subject and Message based on the template configuration.

Assign Task

Note: * fields are mandatory

1.6 Notification When Assigning Tasks with Multiple Attachments

ID# 62288

We've added a new notification that appears when assigning tasks. If your Task includes multiple attachments, after clicking **Assign Task** a new pop-up appears reading "You are about to send x documents for review. Are you sure you want to continue this operation?"

1.7 Attachment Type Internal Name Available

ID# 67733

We've made the Attachment Type Internal Name available in the `eCase.Model.Core.AttachmentInfo` class so that it can be used instead of the Attachment Type Name. This makes it simpler for customers who have requirements around setting attachment type names.

1.8 Configure Permissions Queries on SQL Database

ID# 67846

We've added the option for Search to run Permissions queries on an SQL database. This setting is configurable, and by default it will be set to run on the existing docker service query.

Bug Fixes

We've addressed issues identified by our customers. These bug fixes are outlined in the table below:

ID	Description
54777	Resolved a bug occurring on documents with digital signatures stored in temporary locations.
55469	Font assets are now included in TimeXpress installer.
56561	Resolved an issue where negative and decimal values were able to be pasted into number fields. Now, values with negative signs and/or decimal places are automatically formatted, and negative signs and/or extra decimal places will be stripped when required.
57045	Addressed a bug where the Records Manager and Records Manager Purge jobs were failing due to an issue with closed folders. These jobs now run as expected.
57281, 62647	Addressed a bug preventing some users from accessing Letter Templates within the <i>Attachments</i> tab.
57389	Addressed a bug where custom attributes for SAML Authentication were not preserved after an upgrade.
57971	Corrected an issue where locked attachments were able to be moved between sections of the <i>Attachments</i> tab.
58561	Addressed an issue in which a custom job used to create Portal users and forms was resulting in an error.

ID	Description
59029	The PDF viewer was not loading properly when file names included an apostrophe. This issue has been resolved and files with an apostrophe in the name now open as expected.
60561	When a file was recovered from the Recycle Bin following a re-index, the Display Index for the recovered file would be incorrectly duplicated. This bug has been addressed and Display Indexes are not duplicated after a document or child document is restored.
62538	Corrected a bug where User Searches were resulting in a timeout error.
62781	Addressed an issue where the page forward/backward buttons were not functioning on the Discussion Thread list pages. The buttons now function as expected, so users can view all Discussions by navigating between the pages.
62898	When using the Merge Contacts feature, users were unable to select a master index that had the same name as the contact they were attempting to merge. This issue has been resolved.
64028	Resolved an error occurring during Document Searches.
64093	Corrected an issue where temporary file download folders were not getting purged as expected, causing servers to slow.
64582	Online Editor was not loading properly if a user had an apostrophe in their full name or user name. This issue has been resolved and users with apostrophes in their name are able to open Online Editor.
65398	Addressed a bug preventing certain form pop-ups from displaying properly.

ID	Description
67838	Resolved an issue regarding the login used for TimeXpress installations. Now, the Login ID field is blank as expected, and users with the appropriate permissions can log in to access SQL Server Authentication Mode.
68782	Fixed an issue where eCASE Administration page error logs were not displaying correctly.
69680	Addressed an issue where emails including calendar attachments were not sending properly.
