1 Introduction

1.1 Scope

The purpose of this manual is to guide the user through configuration settings for the Public Access Link (PAL) application.

1.2 Overview

FOIAXpress PAL facilitates the submission of FOIA (Freedom of Information Act) requests over the internet and allows information to be published to the Electronic Reading Room. FOIAXpress PAL is only supported on SQL Databases.

1.3 Getting Started

Before proceeding with the installation, it is necessary to do the following:

- Install and setup the FOIAXpress application and related components.
- Install the PAL application and related components.
- Configure the SMTP Server to relay email to the email server while using FOIAXpress PAL.
 The SMTP server must be configured to relay email messages to other domains.

1.4 References

The following resources were used as a reference in preparing this manual:

- FOIAXpress PAL Server Installation Manual
- FOIAXpress Online Manual

2 Enabling PAL Options in FOIAXpress

To configure PAL for use, it is necessary to enable PAL and its associated options (**Action Offices**, **Request Types**, **Custom Fields**, **Requester Categories** and **Miscellaneous Fields**) in the FOIAXpress application. By doing this, the information displays in the PAL application.

(!!) Notes:

- The information in this section expects the FOIAXpress application to be installed and configured for use.
- You must be a member of the Admin group to enable PAL options.
- For further information concerning PAL options, please refer to the FOIAXpress Online Manual.

Follow the steps below to enable the FOIAXpress PAL:

- 1. Log in to the FOIAXpress application as an Administrator.
- 2. Click **Administration > System Configuration > PAL Configuration**. The PAL Configuration screen appears.
- 3. Select the Enable PAL (Public Access Link) Options checkbox.
- 4. Select the Show Add to Reading Room Prompt When Closing Request checkbox.
- 5. Select a Default Document Publishing Format.
- 6. Click **Save** to retain your modified settings, and then click **OK** within the confirmation window.

l	PAL Configuration		x
	Enable PAL (Public Access Link) Options		
	Show Add to Reading Room Prompt When Closing Request		
	Enable Messages to Requester		
	Default Document Publishing Format : PDF Image		
	Save PAL Request Assignments Refresh	Close	•

(!!) Note: An option to Show in PAL becomes visible for all PAL objects.

2.1 Action Offices

An Action Office is a location (region or department) that shares your instance of FOIAXpress for receiving and responding to FOIA/PA requests. Complete the steps below to configure Action Offices for the PAL:

- 1. Select Administration > Organization Setup > Action Offices. The Action Offices screen appears.
- 2. In the list, click the **Office Code** you want to configure to *Show in PAL*, and then click the **Show in PAL (Public Access Link)** checkbox, as shown in the image below.

- 3. Click Save.
- 4. Click **OK** to retain your settings.
- 5. Click OK.
- 6. Repeat steps 2 through 5 for each Action Office to show in PAL, or click **Close** when Action Offices are fully configured.

2.2 Custom Fields

Custom Fields are user-defined fields that can be used as an index for search and retrieval of records, as filter criteria in a custom report or used to include information specific to a request, requester, or document that is not covered elsewhere in the application to avoid

redundancy. By default, FOIAXpress provides built-in Custom Tabs for Request, Requester and PAL Reading Room, that can be renamed and customized.

- 1. Select Administration > Document Management > PAL Reading Room Custom Fields. The PAL Reading Room Custom Field Groups window appears.
- 2. In the list of **PAL Reading Room Custom Field Group** names, click the row of the group containing one or more field names you want to configure to Show in PAL, and then click **Fields**.
- 3. You can also create a new custom field group, or add fields to an existing custom field groups within this screen.
- 4. In the list of field names, click the field **Name** to configure, and then select the **Show in PAL (Public Access Link)** check box, as shown in the picture below.

New PAL Reading Room Custom Fie	ld 🗆 🖛

Note: * fields are mandatory	

(!!) Note: You can click the Move Up and Move Down arrows to configure the order of the Custom Fields that displays in PAL.

- 5. Click Save.
- 6. Click OK.
- 7. Repeat steps 3 through 5 for each field to configure to Show in PAL (Public Access Link), or click **Close**.

2.3 Lookups

Lookups are pre-defined fields configured for most drop down lists in FOIAXpress. Of the different types of fields, the following are used in PAL:

- 1. Appeal Sub Types
- 2. Delivery Modes
- 3. List Options
- 4. Payment Modes

- 5. Requester Prefixes
- 6. Requester Suffixes

Within the Appeal Sub Types and Delivery Fields menu options, you can create, edit or enable lookups to appear in PAL.

(!!) Notes:

- List Options are values used in conjunction with Custom Fields in FOIAXpress.
- For the purposes of these instructions, Requester Prefixes will be the type of Lookup used.

Follow the steps below to configure Lookups for PAL:

- 1. Select Administration > Lookups > Requester Prefixes. The Requester Prefixes screen appears.
- 2. In the list of prefixes, click the **Prefix** to show in PAL, and then click the **Show in PAL** (**Public Access Link**) checkbox, as shown in the picture below.

	Spell Check Save Back
1	lote: * fields are mandatory

- 3. Click Save.
- 4. Click OK.
- 5. Repeat steps 2 through 4 for each prefix you want to Show in PAL or click **Close**.

2.4 Request Types

FOIAXpress provides you with default request types such as FOIA, PA, or FOIA/PA. Your agency can create new request types, edit existing request types, and delete request types based on their needs.

- 1. Select Administration > Request Management > Request Types. The Request Types screen appears.
- 2. In the list of Request Type names, click the **Name** you want to configure, and then click the **Show in PAL** (Public Access Link) checkbox, as shown below.

Request Type Details	
Request Type* :	FOIA
Request Type Code* :	FOI
Request Format* :	YY-TYPE-#####
Request Format Example :	24-FOIA-12345
Request Type :	Request Appeal
Default Priority*:	Normal 🔻
Active : [
Show in Annual Report :	
Show in Consultation Section of Annual Report :	☑
Allow Request Submission from Public Access Link (PAL) : [
Show in PAL (Public Access Link) :	
Require Response Package Approval Prior to Allowing Document Delivery :	
Proof of Identity/Consent :	V

- 3. Click Save.
- 4. Click **OK** to retain your modifications.
- 5. Repeat steps 2 through 4 for each Request Type you want to show in PAL, or click **Close**.

2.5 Requester Categories

A requester must be classified in a specific category, known as a Requester Category. The category to which a requester belongs is a qualifying factor for granting a request for waiving the fee and/or expediting a request. FOIAXpress provides default requester categories. Your agency can create new requester categories, edit an existing requester category, and delete requester categories based on their needs.

- 1. Select Administration > Request Management > Requester Categories. The *Requester Categories* screen appears.
- 2. In the list, click the **Name of the Requester Category** you want to configure to show in PAL.
- 3. Click the Show in PAL (Public Access Link) checkbox, and click Save.
- 4. A verification message appears. Click **OK** to retain the settings.
- 5. Repeat steps 2 through 4 for each additional Requester Category to show in PAL, or click **Close**.

Once the PAL objects have been enabled in FOIAXpress, are synchronized and you can begin setting up the PAL environment.

(!!) Notes:

- Users must be a member of the Admin group to log into the PAL Configuration application.
- Users must reboot the server once the configurations are completed to reflect the settings in the application.

3.1 Database Configuration

The information presented on this screen is automatically populated with data taken from the PAL installation. Updating this screen is unnecessary unless a new PAL database needs to be configured.

Database Type:	SQLSERVER
Server Name :	tw-ainsdocs
Database Name :	paldb
Windows Authentication :	
Login Name :	afxpagent
Password:	••••
	Save Clear

3.2 General Settings

The information provided on this screen is specific to your agency.

	Please complete all the required fields marked with an asterisk (*).
* Application Title:	PAL Application
* Application URL:	http://qa-fx-app09-pal:81/
Application Version:	10.7.0.3
Enterprise Hours:	9 V 00 V AM to 5 V 00 V PM
* Number of Records per Page:	20
* Error Log Path:	C:\Program Files\Pal
□ Enable SMTP Server:	
* SMTP Server Name/Address:	192.168.1.44 Port: 25
Enable Send Mail:	
508 JAWS Instruction Note:	
	of shortcut keys are available under
	JAWS Section for PAL in the Help
	manuai

Enter general information details based on your agency's requirements as outlined in the table below.

- 6. Click Save.
- 7. A verification message displays. Click **OK** to retain the settings.

Field Name	Description
Application Title	The name of the PAL application as it appears in the title bar of the browser program. "PAL Application" is the default value.
Application URL	The web address for the PAL application. This address appears in the address bar of the browser program.

Field Name	Description
Application Version	The version of the installed application. This field is read- only and not editable.
Enterprise Hours	The time period (in hours) for accepting FOIA requests. Requests submitted after this period will be received the next day the office is open for business.
Number of Records Per Page	The number of lines a requester is able to view after a search is executed. An example is searching documents in the Reading Room.
Error Log Path	Select an output path for the error log file.
Enable SMTP Server	This option allows requesters to receive messages in PAL. When selected, you must enter the SMTP Server Name/Address and Port .
Enable Send Email	When selected, displays the Send Email link in the left panel of the PAL application. This link allows requesters to send a message to the contact email address for the enterprise.
508 JAWS Instructions Note	A brief narrative that directs users to the location for assistance with JAWS.
Save	Accepts and retains the submitted information.
Clear	Removes information entered in the screen.

3.3 Enterprise

The information on this screen represents the agency's mailing and contact information. Administrators can upload the agency's logo if one exists. By default, the *Enterprise Configuration* screen appears when PAL Configuration is launched.

1. Enter enterprise details, as outlined in the table below:

Field Name	Description
Enterprise Name	The identity of the agency.
Address	The street location of the agency.
City	The name of the city where the agency is located.
State	The name of the state where the agency is located.
Country	The name of the country where the agency is located.
Zip Code	The five or nine digit postal code for the agency.
Phone	The telephone number assigned to the agency.
Fax	The telephone number assigned to the agency's facsimile machine.
Contact Name	The name of the representative for the agency.
Contact Email	The electronic address for all automated email messages sent from PAL.

Field Name	Description
Clear Logo	Prompts the user to verify if the logo should be removed. When acknowledged by the user, the logo is removed, the field is reset and the button becomes disabled.
Select Logo	Allows the user to browse the system for an image file, uploads the file, then displays a portion of the image in the available field. The acceptable file formats are JPG, GIF or BMP.
Save	Accepts information entered on the screen.
Clear	Removes information entered on the screen.

- 2. A verification message appears. Click **OK** to retain the settings.
- 3. Click Save.
- 4. A verification message appears. Click **OK** to retain the settings.

3.4 Modules

PAL has two modules: *Requester Interface* and *PAL Reading Room*. The *Requester Interface* allows requesters to submit requests, check the status of a request, create a profile and

receive documents. The Electronic Reading Room allows FOIA Specialists to publish documents for searching and viewing by the public from within FOIAXpress. The *Dashboard* module allows requesters to generate reports and graphs of data based on pre-configured queries and filtered criteria configured by the PAL administrator.

- 1. Enter the locations for Delivered and Electronic Reading Room Documents.
- 2. Click the **Enable send message to office** option, if required. This option displays the **Compose Message** link in the submitted request which allows requesters to send messages to the FOIA office.
- 3. Enter the web address for the Dashboard Administration and Dashboard modules.
- 4. Click Save.
- 5. A verification message appears. Click **OK** to retain the settings.

To enable or disable a module, use the checkbox nex	rt to it.

We hope you will find this site informative and useful and that it will give you a better understanding of the Access to Information Act (ATIA) and its implementation at the [Agency].

Click on the links available on the left side panel to learn more about the application.

3.5 Web API

By August 31, 2023 all agencies with automated systems must achieve full interoperability via an API to the National FOIA Portal. OPEXUS released the API as an add-on to the FOIAXpress Public Access Link (PAL) as part of its v10.3 release. The API integrates with the FOIAXpress Public Access Link to seamlessly receive a FOIA request from the National FOIA Portal into your Public Access Link, which then populates the request into FOIAXpress where it is processed by your staff. As the request is processed in PAL the requester receives automated status updates and is notified the response is posted for viewing in their private reading room and/or available for download.

Since the API is an add-on, it must be purchased along with PAL if your agency is not currently using PAL. Once purchased, OPEXUS provides the agency with the API submission details to populate in the fields below within your agencies Portal Submission Option configuration. Please remember that you may also need to make some changes to your National FOIA Portal profile when you enable this submission format to ensure requesters submitting their requests through the National FOIA Portal are informed of the new process. Use the Web API screen to configure settings for Web API integration. The Web API screen is shown below:

National FOIA Portal Ir	ntegration Module	· 🗹 —

The fields on this screen are described in the table below:

Field	Description
National FOIA Portal Integration Module	Select this checkbox if this configuration is applied to the National FOIA Portal Integration.
	(!!) Note: Selecting this option is required to enable the remaining fields on this page
Security Header Name	Security Header Name associated with the National FOIA Portal.
	(!!) Note: if the NATIONAL FOIA PORTAL radio button is selected, this field is locked and cannot be changed. However, if the OTHER radio button is selected, this field can be manually populated.
API Secret Key	The API Secret Key (use the Generate option for key generation.)
Allowed IP Address	The IP address associated with the portal integration.
Notes	Free-text field to capture notes regarding the configuration that is useful to include on this screen.
Custom Fields for Portal	Select the custom fields to enable for the portal. Mark the checkbox in the <i>Allow</i> column next to each field to be enabled.
End Points	Use the Action Office, Request Type, and End Point URL fields to configure the Web API End Points information. Users can click delete to delete an existing row of End Point information.

After the fields have been completed, click **Save** to save the Web API configuration. Alternatively, click **Export End Points** to export the configuration as an XML document.

3.5.1 Map Requester Categories

The Web API configuration allows for mapping requester categories to sync with the NFP. The map these categories, navigate to the *Web API* screen, then click **Map Requester Categories** at the bottom of the screen. The *NFP Requester Category Mapping* screen appears as shown below:

NFP Requester Category	Internal Name	PAL Requester Category	Action
XYZ	Media	News Media 👻	Delete
Educational	educational	Educational or Non-Commercial Scient	Delete
Commercial	commercial	Commercial Organization 👻	Delete
Other	other	Other	Delete
Scientific	scientific	Educational or Non-Commercial Scient	Delete
Federal	Federal	Federal Government 💌	Delete
uneditable Category	custom	Commercial Organization 🔹	Delete
cust	custdfdf	Commercial Organization	Delete

The NFP Requester Category corresponds to categories used in the NFP. You can also add *Internal Name* and select a PAL Requester Category to map. There is also a button to **Delete** a mapping if needed.

Click Add to create additional mappings. Click Save to retain any changes made to this screen.

3.5.2 View NFP Log

The View NFP Log option allows you to view a log originating from the National FOIA Portal. To view the NFP log, access the Web API configuration screen, then click **View NFP Log** at the bottom of the screen. The National FOIA Portal Log screen appears as shown below:

National	FOIA Portal Log		x
		National FOIA Portal Log	
Received	From Date:	A	
Received	I To Date:	B	
Status:		C Any -	D
			Search Reset

3.6 Security

Since PAL is accessed by the public sector, it is necessary to provide requesters with a secure environment. The *Security Configuration* screen allows the PAL administrator to establish a Password Policy for requesters accessing PAL information and data.

To change default values, enter the following information outlined in the table below:

Field Name	Description
Default values	Administers the system default values and disables the Password Never Expires and User Account Inactivation options.
Passwords never expire	This checkbox permits passwords to not become invalid.
Passwords are valid for	Specifies how long (in days) the current password can be used. This field becomes disabled when the Passwords Never Expire checkbox is selected.
Remind user	Provides a system prompt for a specified number of days before a password is to expire and provides the user the option to change the password. This field becomes disabled when the Passwords Never Expire checkbox is selected.
Do not allow reuse of last	This option limits the use of previous passwords used to access PAL.
Password can contain up to	Sets the character length for recurring characters in a password.
Minimum Password length	Sets the lowest number of characters a password can contain.
Password must contain at least (4)	Sets the number of uppercase letters, lowercase letters, special characters and numeric characters that make up the password.

Field Name	Description
Display Visual verification image (CAPTCHA) after	Displays the CAPTCHA security feature during invalid user login attempts.
Login fails after	Sets how many times a user can unsuccessfully attempt to access the system. If the number of attempts exceeds this value, the user account is inactivated by the system.
Session time-out after	Sets how long a user can remain logged into FOIAXpress (in minutes) before the application terminates. The user must login to the application again to continue any activity currently in progress.
Alert user before Session expires for	Sets the time period (in minutes) to remind the user before the session expires. The system will prompt the user when the session is to terminate and provide options to continue or end the session.
User Account Inactivation	Disables a user account for use in PAL. This field becomes disabled when the Password Never Expires option is selected.
Inactive user account after	This field is enabled if the User Account Inactivation option is selected. This field sets the number of days the account is to remain unusable in PAL.
Username and Password allowed to Match (Partial or Full)	Allows the username and password to have some or all of the same string of characters.

Field Name	Description
Require Temporary Password Update after Login	Allows new users to change the temporary password after logging into PAL for the first time with the temporary password.
Display Visual verification image (CAPTCHA) in Forgot Password page	This checkbox turns on CAPTCHA verification for the Forgot Password feature.
Allow Change Password every	Sets the minimum number of hours allowed between password change attempts.
Apply Password Policy to Administrator	Employs the password policy to the PAL Administrator.
OTP Type for Pal Admin Login	Sets the method through which PAL Configuration users receive OTP. The recommended method is Email.
Admin Login OTP Expiry Time	Sets the number of minutes an OTP will remain active. The recommended time is 10 minutes.
Save	Saves information entered on the screen.
Clear	Removes information entered on the screen.

Security Configuration Please complete all the required fields marked with an asterisk(*).			
🗸 Default values			
Passwords never expire **	: 🗖		
Passwords are valid for **	: 90 days		
Remind user **	: 5 days before password expires		
Do not allow reuse of last	: 12 passwords (including current)		
Password can contain up to	: 2 repeating character(s)		
Minimum Password length	: 8 characters		
Password must contain at least	: 2 uppercase letter(s)		
Password must contain at least	: 2 lowercase letter(s)		
Password must contain at least	: 2 special character(s)		
Password must contain at least	: 2 numeric character(s)		
Display Visual verification image(CAPTCHA) after **	: 3 unsuccessful Sign in attempts		
Login fails after	: 10 invalid login attempts

Note: Maximum password length allowed is 64 characters.			
Total password length constitutes of uppercase, lowercase letters and special, numeric	characters.		
**: Not applicable to PAL Config Administrators			

3.7 Authentication

The Authentication configuration allows users to enable SAML SSO authentication with Identity Provider for login, as well as form authentication using OTP. Please see the SAML Login and Proof of Identity Configuration manual for more information on integrating SAML SSO Authentication in PAL.

The Authentication Configuration is shown below:

 Authentication Configuration Please complete all the required fields marked with an asterisk(*).
 Authentication Options
Enable Login with Forms Authentication
OTP Settings
* OTP Notification Type: None * OTP Expiry Time: 5
○ Enable Login with SAML Authentication
Use SAML Configuration Tool for configuring identity provider.
Save

To enable login using Forms Authentication, select the **Enable Login with Forms Authentication** option. There are additional fields to configure *OTP Settings*, and you are required to select an **OTP Notification Type** (select **None** to disable OTP), as well as the **OTP Expiry Time** (in minutes).

To enable Login with SAML Authentication, select the **Enable Login with SAML Authentication** option, then use the **SAML Configuration Tool** to complete the SAML configuration process. See the *SAML Configuration Tool* document for steps to run this tool.

Click **Save** to save any changes made to the Authentication Configuration.

3.7.1 Authentication Configuration & Identity Validation

Identity Validation (i.e., Login.gov or ID.me) integration is used to authenticate a requester's proof of identity when submitting a request through PAL. There are two methods of authentication which can be utilized by FX PAL: Identity Assurance Level 1 (IAL1) and Identity Assurance Level 2 (IAL2). IAL1 authenticates via standard Username and Password entry, whereas IAL2 leverages an additional Identity Validation Solution to provide proof of identity.

IAL1 authentication is recommended for general login to PAL to ensure requesters are not required to submit proof of identity, unless they are submitting a request type that requires it. The second level of configuration, IAL2, is enabled only when a request type requiring Proof of Identity is selected.

To configure the SAML authentication method for requesters, navigate to the **PAL Configuration>Authentication**. Within the *Authentication Options* workspace, select the **Enable Login with SAML Authentication** radio button and click **Save**.

In addition to enabling the Login with SAML Authentication within PAL Configuration, the connection with the identity provider must be configured on the application server.

3.7.2 Identity Validation Options

If a request type within FX is configured to require proof of identity, requesters are forced to submit a proof of identity form. A Proof of Identity and Consent form can be found on every submitting Agency website. A hyperlink to the Agency's Proof of Identity and Consent form can be hosted within the request submission form. Per *OMB M-21-04*, Agencies must be willing to accept this form in electronic format as sufficient proof of identity. Once completed and saved, this authentication form can be uploaded in the *Proof of Identity* attachment workspace in the PAL Submission Form.

If the *Digital Authentication* radio button is selected, a link appears and redirects the requester to Login.gov to login with existing credentials or to create a new user profile. An IAL1 (Username and Password) login is not sufficient to authenticate a requester identity. To provide digital authentication, Login.gov will require an IAL2 profile and will assist the requester with the process of providing their user authentication information. After the requester submits their information, they receive a security code via email or authentication via phone. After successfully completing their validation, the requester is returned to the request submission page, which now has the Proof of Identity validated and will share the validation with the agency upon request submission.

Request Information (Header)	New request Information				
Description Document	Description Document		Z		
* Description	Description				
Date Range for Record Search	Date Range for Record Search		Z		
Proof of Identity/Consent (Header)	Proof of Identity/Consent				
Proof of Identity Mode	Verification Mode			Proof of Identity Option: Upload Attachment	/[~
Consent	Consent		<u> </u>	Upload Attachment Upload Attachment	Digital Authentication
Proof of Identity	Proof of Identity				
Digital Authentication	Digital Authentication		 Image: A set of the set of the		

If one of the above Proof of Identity methods is satisfied, the system permits the requester to complete submission of a request.

After a request is received from PAL, the *Request Information* tab features the *Proof of Identity/Consent* workspace, which displays the date the requester's identity validation was received, as well as any attachments provided during request submission. If the request is received via any other submission method, the proof of identity section in FX can be manually updated with the received date and required attachments. If the required information is not provided, the FX requester can use PAL Messages, Email, and/or Letter Templates to request this required information from the requester and stop the clock until Proof of Identity validation is received.

Typically, organizations will satisfy identity requirements using Username and Password or IAL1. If an organization will only be using the application to process FOIA Requests and they do not require proof of identification, they only need to utilize IAL.2.

(!!) Note: For more information about how proof of identity solutions authenticates a requesters identity or how to partner with an identity proofing solution, visit the solutions providers website (Login.gov or ID.me)

3.8 Email Templates

Certain events in PAL trigger an email notice sent to a requester or the FOIA office. These email notices are created from email templates, which represent the automated messages that are sent from PAL. Users with sufficient privileges are able to update the subject and body of the template to suit their agency's requirements.

- 1. Click Email Templates.
- 2. Select the type of template from the available list. For an explanation of each template, click the **Question Mark** button.
- 3. Make any necessary modifications to the subject or body of the template using the available tools provided by the Editor program and preset fields found on the **Insert Fields** menu.
- 4. Click **Save** to retain the edits to the template.

Email Templates Configuration Please complete all the required fields marked with an asterisk(*).

3.9 Email Log

The Email Log tracks messages sent from PAL and is used for reporting and administrative purposes. Administrators can view and print a report of all messages sent based on search criteria.

3.9.1 View & Export

Follow the steps below to view and export items from the email log:

- 1. Navigate to Administration > Jobs.
- 2. Click Email Log.

Home >> Administration	
System Configuration	Jobs
System Administration	All Jobs
Dashboards	Email Log

3. Enter search criteria based on the available fields, as described below the following image:

	Email Log Information
Template	
Sent To(Email Address):	*
Requester's First Name:	*
Requester's Last Name:	*
Status:	All
	Sent Date
From:	III To:
	Course Class
	Search Clear

Field	Description
Template	See logs using the specific templates used, from the drop down list.
Sent To (Email Address)	See emails sent to a specific email address.
Requester's First Name	See emails exchanged from a specific requester (using requester's first name.)

Field	Description
Requester's Last Name	See emails exchanged from a specific requester (using requester's last name.)
Status	Select an email status from the drop down list.
Sent Date	Use the <i>From</i> and <i>To</i> fields to narrow down log results to a specific date range.

4. Click **Search**. The system executes the search and the screen refreshes to display records that satisfied the search criteria.

Date & Time	Template	Requester's Name	Sent To	Status	Resend

8. Click **Export** to download a copy of the report to the local or network drive using one of the available formats (Export Options radio buttons).

(!!) Note: Users are not able to download the Email Log if they are using a secured environment.

3.9.2 Clear Log

Follow the steps below the clear the email log:

1. Navigate to the *Email Log Information* screen and click **Clear**.

Email Log Information
Template: All
Sent To(Email * Address):
From: To:
Search Clear

- 2. The system displays a confirmation message, asking if the user would like to export the log prior to clearing it.
- 3. To export the log, click **OK** and follow the steps as outlined in the previous section.
- 4. Click Cancel to proceed without exporting.

- 5. After clicking **Cancel** the system displays a verification message, confirming you'd like to clear the log. Click **OK**.
- 6. After clicking **OK**, the log is automatically cleared. If you selected to export the log, it is automatically downloaded after starting the clear process.

3.10 Users

Provisioned PAL users are managed from the Users screen, as shown below:

<u>G</u> eneral Settings E <u>n</u> terprise				Users		
Mod <u>u</u> les Web API	New Edit Delete					
Security						
Email <u>T</u> emplates Ema <u>i</u> l Log	Login	First Name	Last Name	Email	Is Active?	Is Locked?

Documents	tester	Т	А	qa3@ains.com	Yes	No
Display Order	User	pal	pal	qa@ains.com	Yes	No
Dashboard Administration						
Online Payment						

Administrators can use the New, Edit and Delete buttons to manage PAL users.

Follow the steps below to create a new user:

1. Click **New**. The *Create User* screen appears.

	Create user	
Login Name :		
*First Name :		
*Last Name :		
*Email :		
Phone Number :		
*Password :		
	Create Back	

2. Complete the required fields and click **Create.** The new user is created.

(!!) Note: Fields with a red asterisk (*) are mandatory and must be completed.

3.11 Audit Log

FX PAL maintains a record which tracks information for requests where payments are made, and requests are not submitted through sync. The Audit Log allows authorized users to complete audit queries based on their desired search criteria, displayed in the images below:

	Audit Log Search					
Activities						
 Administrator Actions Requester Actions Requester Logins Failed Transactions 	Select Audit Object All General Settings Enterprise Modules Web Api Security Authentication Email Templates Email Log	~				
Select Administrators(s): All	~					
 Between Dates For the Week For the Month 	Select Date Range From : To :	1				
For the YearYear to Date						
ar Year	Search					

To execute an audit log search:

1. Login to the PAL Configuration page using the administrator account. Click Audit Log.

<u>G</u> eneral Settings

3.12 Requester Fields

The *Requester Fields* screen allows administrators to control which fields are presented to a requester when creating a profile. Fields with a red asterisk (*) are mandatory and must be completed. These fields are not editable and are read-only. Fields with a drop down list can be configured to have a standard value.

- 1. Click Requester Fields.
- 2. Indicate the **Required** and **Visible** fields and **Default** values based on your agency's requirements.
- 3. Enter **Tooltip** information, if required.

(!!) Note: Tooltip information are prompts that users can view when seeking additional information about a field or selection.

4. Click Save.

Ø

- 5. A verification message appears. Click **OK** to retain the settings.
- 6. Click **Refresh** to reload information on the screen.

Save Refresh

Field Name	Description
Automatically attach request form as a request letter	This creates an XML file as the Request Description Letter in the <i>FOIAXpress Correspondence Log</i> . When selected, reveals the Allow Additional attachments to be included option.
Allow Additional attachments to be included	 This option activates the Add Attachments link in the <i>Request Details</i> section of PAL. The document uploaded by the requester is saved as the Request Description Letter in the <i>FOIAXpress Correspondence Log</i>. All Formats allows requesters to submit any file type. Specific Formats allows administrators to specify the types of files accepted from a requester.

Field Name	Description
Enable Expedite Requested Attachment	 This option activates the Add Attachments link in the <i>Expedite Requested</i> section of PAL. The document uploaded by the requester is saved as the Expedite Description Letter in the <i>FOIAXpress Correspondence Log</i>. All Formats allows requesters to submit any file type. Specific Formats allows administrators to specify the types of files accepted from a requester.
Enable Fee Waiver Requested Attachment	 This option activates the Add Attachments link in the <i>Fee Waiver Requested</i> section of PAL. The document uploaded by the requester is saved as the Fee Waiver Description Letter in the <i>FOIAXpress Correspondence Log</i>. All Formats allows requesters to submit any file type. Specific Formats allows administrators to specify the types of files accepted from a requester.
Enable Consent Attachment	This option activates the Add Attachments link in the <i>Consent</i> section of PAL. The document uploaded by the requester is saved as the Consent Letter in the <i>FOIAXpress Correspondence Log</i> . All Formats allows requesters to submit any file type. Specific Formats allows administrators to specify the types of files accepted from a requester.

Field Name	Description
Enable Proof of Identity Attachment	This option activates the Add Attachments link in the <i>Proof of Identity</i> section of PAL. The document uploaded by the requester is saved as the Proof of Identity Letter in the <i>FOIAXpress Correspondence Log</i> . All Formats allows requesters to submit any file type. Specific Formats allows administrators to specify the types of files accepted from a requester.

- 5. Click **Refresh** to reload the original settings.
- 6. Click **Save** to retain the settings. A verification message appears.
- 7. Click **OK** to accept the settings and close the message window.

3.14 Appeal Fields

This screen provides administrators the ability to control which fields are presented to a requester when creating an appeal. Fields with a red asterisk (*) are mandatory and must be completed to successfully submit an appeal. These fields are not editable and are read-only. Fields with a drop down list can be configured to have a set of standard values.

1. Click the **Appeal Fields** link on the left panel. The *Appeal Fields* screen appears as shown below (a sample portion of the fields are shown):

	Appeal Fields Configuration Please complete all the required fields marked with an esterist(*).

1. Select the desired options for the *Request Status Information*. This section allows administrators to control which fields are available when checking the status of a submitted request if the requester is registered or not. Fields that are grayed-out cannot be modified and are the default fields displayed on the *Request Status* screen. The total width of the displayed fields must equal 100%.

2. Indicate whether to **Enable Non PAL Requests Status Information**. This option allows requests submitted to the FOIA office via mail, email, or fax to be tracked online by PAL users that do not have registered profiles.

3. Indicate whether to display Verification Fields while checking the Request Status information without registering. This option allows requests submitted to the FOIA office via mail, email, or fax to be tracked online by PAL users that do not have registered profiles, by requiring the case tracking number, requester last name and characters displayed in the distorted image to ensure the request was not submitted by a computer. Non-registered users will have restricted access to fee information and responsive records.

4. Indicate whether to **Show Requester Details on Request Submission Form**. This option displays the *Requester Details* section with contact information of the registered requester.

Requester Information

5. Indicate whether to **Send Email Notification to Requester**. This option enables automated notifications sent to the requester when the request is updated to the selected status (es).

Send E	Email Notification of Payment Due to Requester

lote: Requ	Just Status Update Notification will be sent to the Requester when the status of the request is updated

- 6. Click **Refresh** to reload the original settings.
- 7. Click **Save** to retain the settings. A verification message appears.
- 8. Click **OK** to accept the settings and close the message window.

3.16 Reading Room

3.16.1 Reading Room Fields Configuration

To access documents in the reading room, requesters must first perform a search. The *Reading Room* screen contains the searchable fields requesters need to complete to retrieve documents.

- 1. Click Reading Room.
- 2. Indicate the Reading Room Fields you want to be visible in the application.
- 3. Enter any **Tooltip** information, if required.
- 4. Accept the default value for the **Number of Views Constitutes a Popular Document** or enter a value. This value represents the number of times a document is viewed before it is considered popular or a frequently requested document.
- 5. Indicate whether you want to **Display PAL Reading Room Search Screen** for popular documents. This option displays the search screen for the *Reading Room Popular Documents* section in the application. The search information displayed is the same as the information configured for the Reading Room. To view the search screen, the **Reading Room Popular Documents** label must be enabled in the *Main Menu Links Configuration* screen.
- 6. Indicate whether you want to **Enable Content Search**. This option displays the **Content Search** field in the reading room and popular documents search screens. This feature allows users to find a specific string of characters, words, or phrases.

Label Name	Display Name	Tooltip	Visible
Folder Name	Folder Name X		Image: A start of the start

7. The PAL Reading Room can be configured to display custom fields in the search screen. These fields are created and activated for PAL in the FOIAXpress application.

Document Location Info Document	ocation Info	V	
Service Center Location Service Ce	nter Location	V	
Keyword Keyword	ĺ		

3.16.2 Remote Content Search

The Content Search for the PAL Reading Room can be configured to exist on a separate file repository from the application server. Follow the steps below to enable remote content search:

- 1. Enable content search per the instructions in the previous section.
- 2. Create a share folder (UNC path) for PAL Reading Room documents.
- 3. Add the PAL application pool account to the UNC path created in the previous step, including *Modify* permissions.

(!!) Note: If the PAL website is running with the *Network Service* account, add the system account (domain/computer name\$) to the UNC path, including *Modify* permissions.

4. Update the path in the Reading Room tab under PAL Configuration.

3.17 Reading Room Documents

3.17.1 Search Reading Room Documents

The Reading Room Documents search configuration allows you to search for documents added to the Reading Room. To search existing Reading Room documents:

1. Click **Reading Room Documents**. The *Search for Documents in Reading Room* screen appears as shown below:

		Search for Do	ocuments in Reading Room				
			<u>Spell Che</u>				
he Access to Information Act, (R.S.C., 1985, c.A-1), requires that certain documents of interest to the general public be ublished electronically. [ATIA Agency] is making these documents available to the general public in electronic form. Search for Documents in Reading Room

Refine your Sea	e Reading Room	File Cabinet *	Description				
Refine your Sea	e (File Cabinet *	Description				

- 2. Use the fields on this screen to locate existing documents. You can refine your search using the *Refine Your Search* fields.
- 3. Select *Reading Room Filing Cabinet(s)* to search from the list.
- 4. Use the Folder Name field to locate a specific folder name.
- 5. Use the Published Date fields to search using a specific date range
- 6. Search document content using the *Content Search* field.
- 7. Click **Search** to locate any documents matching the search criteria. The *Reading Room Documents* screen appears as shown in the following example:

	Reading Room Documents									
	<u>Folder Name</u> -	<u>Reading Room File</u> <u>Cabinet</u>	Published Date	Expiration Date	<u># Pages</u>	<u>Format</u>	Added From	Popular Document?

8. You can select any of the results from the list and use the buttons to add **New** documents, **Edit** the selected documents, or **Delete** the selected document.

3.17.2 Add Reading Room Documents

You have the option to create and save Reading Room document searches for later use.

- 1. Click Reading Room Documents.
- 2. Click New. The Add Reading Room Documents screen appears.

		Spell Check
* Folder Name :		
* Reading Room File Cabinet :	Annual Reports

Show in Reading Room :	\checkmark	
Never Expires :		
Comments :		
	✓	

- 3. Enter the required elements outlined in the table below.
- 4. Click **Save** when completed.

Field Name	Description
Folder Name	The title given to the document.
Reading Room File Cabinet	Reading Room File Cabinet where the document should be uploaded. Select from the listed options.
Browse Document	Allows the users to locate the file from their local/network drive. The acceptable file formats are PDF, TIFF, ZIP, DOC, XLS, DOCX and XLSX.
Number of Pages	Indicates the size of the document (in pages).
Published Date	Indicates the date the document was published to the Reading Room. Today's date is the default.
Show in Reading Room	Indicates if the document is available in the Reading Room.
Never Expires	Indicates whether the document remains in the Reading Room. If unselected, the Administrator can determine the date the document expires.
Comments	A brief narrative describing the document.
Refresh	Reloads the screen to its original settings prior to saving.
Back	Returns to the previous screen.

3.18 Display Order

This screen allows administrators the ability to determine the order for **Request**, **Requester**, or **Reading Room** section headers and fields in the application.

- 1. Click **Display Order**.
- 2. Select the desired **Module** from the drop down list.
- 3. Accept the default option to **Configure Headers** or select **Configure Fields**.
- 4. The **Headers Display Order** list updates to display only headers based on the selected module.
- 5. The **Fields Display Order** field is revealed when the **Configure Fields** option is selected and automatically adjusts to display fields based on the selected module and header.
- 6. Use the **Up** and **Down** arrows to reposition the headers and/or fields.
- 7. Click **Refresh** to reload the screen with the default settings.
- 8. Click **Save** to retain the settings.

Module	Request Fields	
	C Configure Headers	Configure Fields
Headers Display Order	General Information Shipping Address Request Information Appeal Information Fee Information Billing Address Other Information	
Fields Display Order	Action Office Action Office Instructions Request Type Appeal Type Appeal Sub Type Requester Category Reference No.	

3.19 Dashboard Administration

This link launches the **Dashboard Administration** application. Please refer to the PAL Dashboard User Manual for further information concerning this link.

3.200nline Payment

The online payment option is used to configure the integration between the PAL and an agencies' existing online payment solution (i.e., Pay.gov). When the *Enable Online Payment* option is checked, the drop down list includes the name of the integrated PAL online payment solution and, upon selection, displays the configuration fields required to communicate between PAL and the payment solution.

The online payment integration provides the ability for agencies to require payment prior to accepting a request submission and/or providing requesters a method of submitting payment for charges billed to them related to their record request.

In addition, the information the requester sees on their receipt (as triggered by the application) is also configured here. Follow the steps below to configure Online Payments:

(!!) Note: Each PAL integration is different, so different fields may be available for configuration purposes.

- 9. Click Online Payment.
- 10. Select the **Enable Online Payment** checkbox to enable the online payment option for your PAL.
- 11. Under the *Payment Option* drop down list, select the **Payment Option** to enable for PAL. These options are based on the integrated payment solution(s) you have connected to your FOIAXpress application.
- 12. After selecting an available **Payment Option**, additional configuration fields appear to configure the selected payment method.

(!!) Note: The screen below is presented as an example. The fields shown here may not apply to your online payment configuration.

13. After configuring the desired fields as needed, click Save.

3.21 Main Menu Links

This screen is used to configure the links available to the requester in the left panel.

- 1. Click Main Menu Links.
- 2. Click the checkboxes next to the options to enable in the Main Menu of the application.
- 3. Accept the default **Display Name and Access Key** or modify the information based on your agency's requirements. The Access Key is the keyboard combination used to select a link.
- 4. For example, **<Alt> + <R>** will select the **Request Status** link.

- 5. To access additional options to open a link:
- 6. Select the checkbox next to a label name. The **Open In** drop down list becomes available.
- 7. Click the drop-down list and select **Right Panel** to display the link on the right panel or **New Window** to launch a new window when the link is selected.

(!!) Note: Although Administrators have the option to specify an alternate location for opening links, it is not recommended to do so. Keeping the links in the main menu makes it easier for users to navigate within the application.

3.22Enabling Links

Administrators can determine whether a user must be registered in order to submit a request or an appeal and when the **Submit Request**, **Submit Appeal**, **Request Status** and **Appeal Status** links should appear in the application.

- 1. Select the desired options based on the information outlined in the table below, as per your agency's requirements.
- 2. Click **Refresh** to load the screen with the default settings.
- 3. Click **Save** to retain the updated settings.

Field Name	Description
Enable Request Link	Determines when to display the Submit Request link. If Always is selected, the link displays at all times. If Only after Sign In is selected, the link displays after the user successfully completes registration.
Enable Appeal Link	Determines when to display the Submit Appeal link. If Always is selected, the link displays at all times. If the Only after Sign In radio button is selected, the link displays after the user successfully completes registration.
Enable Request Status Link	Determines when to display the Request Status link. If Always is selected, the link displays at all times. If the Only after Sign In radio button is selected, the link displays after the user successfully completes registration.

Field Name	Description
Enabling Sub Links (When Requester is not logged in):	This option becomes enabled if Always is selected as the preferred method to display any of the above links. Administrators can opt to have all or some of the sub links appear. By default, selecting the <i>Check Request Status without registering link</i> checkbox appears in the <i>Request/Appeal Status</i> screen if no sub links are selected.

3.23Layout Settings

This screen provides guidelines for administrators to customize the appearance of the PAL application theme. Administrators can select one of several predetermined themes, or they can customize their own theme using a custom style sheet.

3.23.1 Standard Theme

The PAL configuration offers several out-of-the-box themes to easily select and apply. Follow the steps below to use a built-in theme.

1. Click Layout Settings.

Main Menu Links Layout Settings Messages Change Password Disclaimers Error Log Manuals Release Notes Hotfixes	Online Payment	
Layout Settings Messages Change Password Disclaimers Error Log Manuals Release Notes Hotfixes	Main <u>M</u> enu Links	
Messages Change Pass <u>w</u> ord Disclaimers Error Log Manuals Release Notes Hotfixes	Layout Settings

		sign in suc	cesstul.			
To continue, use the menu naviga	tion ontions at the	ton of this name to evolo	e this website, submit a	request_or check statu	s of your existing n	equest

- 3. If satisfied with the selected theme, click **Save** to apply the changes to the application.
- 4. A confirmation message displays. Click **OK**.

3.23.2 Custom Theme

You have the option to customize your own theme using a Cascading Style Sheet (CSS) file. You'll first download the *Custom.css* file, then edit the contents as needed to customize the look and feel of your application. Follow the steps below to design a custom PAL theme.

(!!) Note: You will need a working knowledge of CSS in order to create a custom PAL theme

- 1. Click Layout Settings.
- 2. Select **Custom** from the Select theme for Application drop down list.
- 3. After selecting **Custom**, buttons will appear with options to **Save** or **Download**. Click **Download** to save the Custom.css file to your local drive

(!!) Note: This file must keep the name Custom.css. If the name is changed, PAL will not be able to read the file and apply custom settings.

4. Open the Custom.css file and edit the style sheet file as needed to apply a custom theme. You will need a working knowledge of CSS to fully customize the style, however a basic guide is included on the *Layout Settings* screen with examples of where and how the CSS file should be edited to produce the desired results. A sample of the *Main Menu* customization options are shown below.

	[FOIA Agency]	🖍 Register 🕒 Sign In 🛛 Help 🗸

color: #3 backgroun border-to	333; nd-color: #fff; np: 1pxsolid#333;	

5. When you have configured your Custom.css file and are ready to apply the layout updates, navigate to **Layout Settings** and select the **Custom** theme from the *Select theme for Application* drop down list.

					Browse	Upload
Select theme for Application	Custom	1	Save	Download		

6. Click **Browse**, and navigate to and select the **Custom.css** file to upload.

(!!) Note: This file must be named Custom.css. PAL will not accept a custom theme with any other name.

7. The file path for the selected file appears. Click **Upload** to upload the custom CSS file.

(!!) Note: After a custom theme has been uploaded, you can download this custom style sheet file by clicking Download.

- 8. Click **Save** to apply the customized theme to your PAL application.
- 9. A confirmation message appears. Click **OK** to close this window and complete the updates to the layout settings.

3.24Messages

Messages Configuration provides a means for administrators to customize content on various screens within the PAL application. Additionally, the header and footer can be customized to suit your agency.

- 1. Select a **Message Type** from the *Message Type* drop down list.
- 2. Add or modify content based on agency requirements using the available tools provided by the Editor program.

- 3. Click Save. A verification message appears.
- 4. Click **OK** to accept the content and/or settings.
- 5. Repeat steps 1 4 for each message to configure.

(!!) Notes:

- The Help message displays the PAL Configuration online manual, and is used by administrators as a reference. The information on this screen is provided by OPEXUS and should not be altered.
- You must reboot the application server or reset IIS to update the content and settings reflected in the application.
- If your system is configured with more than one server, e.g. load balancing servers, make sure messages are configured on both servers.

3.25Change Password

There may come a time when it is necessary to change the Administrator's password. The *Change Administrator's Password* screen allows authorized users to create a new password for the PAL Configuration application.

(!!) Notes:

- The Password Policy created in the Security module must be followed to successfully change the password.
- Changing the password will affect access to the Dashboard Administration application.

Follow the steps below to change the Administrator password for PAL:

- 1. Click Change Password.
- 2. Enter the **Old Password** in the **Old Password** field.
- 3. Enter the New Password in the New Password field.
- 4. Re-enter the New Password in the Confirm Password field.
- 5. Click Submit.

	Change Administrator's Password	
Pleas	se complete all the required fields marked with an asterisk(*).	
		-
	Change Administrator's Password	
	Login: Administrator	
	* Old Password:	
	* New Password:	
	* Confirm Password:	
	Submit	

3.26Reset a Requester Password

If a requester has requested a password reset, complete the following:

[FOIA Agenc	y]	My Account	Change Password	Inbox	(0)	Send Mail	Sign Out	Help 🔻
Dashboard	Reading Room Popular Documents	o Other(P)	Reading Room	Home	Submi	t Request	Submit Appe	eal
Request Statu	15							

- 1. If you have received requester password reset request, log in to the PAL Configuration page.
- 2. Log in using the administrator login and password.
- 3. Click **Reset Requesters Password**. The Search Requester to Reset Password screen appears.

At least one field is required.

5. After locating the desired requester within the search results page, click the **Reset** button in the Action column for the desired requester.

(!!) Note: You can click an entry in the search results table to highlight it.

6. The screen refreshes, and the banner indicates that the password reset was successful and the desired requester will receive a password reset email. From this point the user will be prompted to reset their password information.

Password has been reset and sent to requester's email.

7. The requester must now access their email and complete the password reset process, using their login and temporary password. If password verification questions were set up during account creation the requester will need to answer them to verify their account complete the password reset.

Dear Dear Once you login, please change your password to protect your account details. User Name: Password:
3.27 Disclaimers

Administrators can provide disclaimer information to notify requesters of their agency's policy for collecting personal information.

- 1. Click Disclaimers.
- 2. Add **Requester Privacy Disclaimer** text based on your agency's requirements using the available tools provided by the Editor program.
- 3. Select the position for the text to appear on the screen (**Top** or **bottom**).
- 4. Select which screens you want the text to appear on (My Account, Request, and Appeal).

3.28Error Log

The Error Log provides details to help identify problems and for troubleshooting issues that may arise while using the PAL application.

- 1. Click Error Log.
- 2. Click **Clear** to remove the Error Log contents. Make any desired alterations to the Error Log display.
- 3. Click **Save** to store a copy of the Error Log to your local or network drive.

4 National FOIA Portal

The procedures below describe the two halves of the National FOIA Portal Integration with PAL. First, users must generate the XML file, which determines values which are useful in the later stages of the configuration process. Next, users must use the information contained in this XML file to complete the National FOIA Portal Configuration.

(!!) Note: Only users with Administrator access to the PAL Configuration portal can perform this work.

4.1 Integrating PAL with the National FOIA Portal

If your agency purchases a National FOIA Portal integration license, it can perform the integration using the procedures described below:

- 1. Navigate to your organization's PAL Configuration portal.
- 2. Enter the Login ID into the field.
- 3. Enter the **Password** into the field.
- 4. Click Sign In.

PAL Configuration Login					
Login:					
Password:					
	Sign In				

5. Click Web API. The WebAPI Configuration screen appears.

						WebAPI Configuration			
General Settings Egterprise Modules	National FOIA Portal Integration M Security Header Name :	Iodule I		• NATE	ONAL FOIA PORTAL	O OTHER			
Security Authentication Email Templates	API Secret Key :			Generate					
Email Log Users Audit Log	Allowed IP Address:								
Requester Eields Request Fields Appeal Fields	Receive Mode:	National FOIA Portal							
Other Settings Reading Room		Id	Name	T	/pe	Allow			
Reading Room Documents	Custom Fields For Portal:	There are no custom field fo	r portals		-				
Display Order		Action Office	R	equest Type		End Point URL			
Online Payment	End Points :	[- 1	OIA	*	http://trn-fx103:81/Components/0/Regu	ests/CreateRequest	Delete	
Main Menu Links(Alt + P) Layout Settings Messages		Add							
Change Password Reset Requester's Password							View NFP Log	xport End Points	Save

6. Complete the fields described in the table below:

Field	Description
Security Header Name	National FOIA Portal sends a header that reads FOIA-API-SECRET with every request. If the header does not match, the request is rejected.
API Secret Key	Clicking the Generate button creates a new secret key. This key is used by National portal to submit a FOIA request securely. If the secret key present in the request does not match with the agency's secret key, the request is rejected.
Allowed API Address	Configure the desired IP addresses. Typically, these are National Portal's IP addresses.
Custom Fields for Portal	If administrators want to capture additional data from the National Portal, they can include Request Custom Fields. Your administrators must work with National FOIA Portal administrators to configure any additional custom fields.
End Points	This is the Action Office receiving the selected request type. Click Add to create additional end point workspace entries. Click Delete to remove a selected end point workspace entry.

7. Click Save.

8. Click Export Service. An XML file is generated.

(!!) Note: This XML file contains information such as service end points, action office details, secret key, etc. This content is required for National FOIA Portal Configuration.

4.2 National FOIA Portal Configuration

Administrators must use the information contained in the XML file generated in the Integrating PAL with the National FOIA Portal section to complete the National FOIA Portal Configuration. To complete the National FOIA Portal Configuration:

- 1. Login into National FOIA Portal Configuration page using the Administrator profile.
- 2. Within the left navigation panel, click **Web API**. The WebAPI Configuration screen appears as shown below.

Server Configuration Scenarios

	WebAPI Configuration
National FOIA Portal I	Integration Module
Security Header Name :	
API Secret Key :	Generate
Allowed IP Address:	P
Request Type:	FOIA
Allowed Components:	d All
Custom Fields For	r Id Name Type Allow
Portal:	There are no custom field for portals

3. Click the **National FOIA Portal Integration Module** checkbox. The page refreshes and the *WebAPI Configuration* fields are now enabled.

	WebAPI Configuration
National FOIA Portal Integration Module	
Security Header Name : FOIA-API-SECRET	Intional foia portal O other
API Secret Key :	Generate

4. Ensure the National FOIA Portal radio button is selected.

National FOIA Portal Integration	Module 🗹	
Security Header Name :	FOIA-API-SECRET	NATIONAL FOIA PORTAL OTHER
API Secret Key :		Generate
Allowed IP Address:		
Receive Mode:	National FOIA Portal	

- 5. Enter the Security Header Name in the field.
- 6. Click **Generate** to create a new API Secret Key. Copy this key to your clipboard.

(!!) Notes:

- The Submission API URL is generated in the PAL Configuration page for each action office. You can locate this information within the XML file exported from PAL configuration.
- The API Secret Key is used by National Portal to submit FOIA requests securely. Enter the key in the Submission API Shared Secret field in the Portal Submissions Options page of the National FOIA Portal.
- 7. Enter the five IP Addresses provided by DOJ in the Allowed IP Addresses field.
- 8. Select the desired **Request Type** from the drop down list. Selections in this field permit ingestion of additional non-FOIA request types.
- 9. Enter any desired **Notes** in the field.
- 10. Enter any **Custom Fields** for the Portal in the Custom Fields for Portal workspace.
- (!!) Note: This can only be performed after the custom fields are configured in FX.
- 11. Configure the *End Points* by selecting the **Action Office**, **Request Type**, and **End Point URL**. Click **Add** to enter new End Points within the workspace.
- 12. If desired, click **Export End Points** to export an XML file containing the shared secret key and end point URL required to complete the configuration.
- 13. Click **Save**. The configuration information is updated.
- (!!) Note: The above process needs to be completed for each action office.

5 Sign Out

Click the **Sign Out** link on the left panel to exit PAL Configuration application and return to the login screen. A verification message appears. Click **OK** to continue signing out or **Cancel** to abort exiting the application.

(!!) Note: It is necessary to sign out and reboot the server or reset IIS to have the configurations reflected in PAL.

6 Release Notes

Release notes are communication documents shared with customers and clients of OPEXUS, and they detail the changes or enhancements made to the features of PAL. The number of documents varies depending on the type of installation performed. If you have a new installation of PAL, release notes for version 10.1 and above are displayed. However, if PAL was upgraded from one version to another, users may see earlier versions of release notes. Click the document link to open or save a copy to your local/network drive.

7 Inserting an Image

The instructions in this section assist administrators in the event images must be inserted into messages such as in the *Header*. The recommended file type for images are JPG or JPEG.

1. Add the image(s) to the C:\inetpub\wwwroot\PublicAccess Link\Pal\images folder.

> () ⊂ 🔟 🝷 inetpub	www.root + PublicAccessLink + PAL + images	▼ 🚱	Search images

- 2. Click Add Image within the Editor's toolbar. The Picture window appears.
- 3. Enter the URL for public use in the **Picture Source** field. (This is not the PAL Configuration URL.)
- 4. For example, <u>https://hudpal.efoia-host.com</u>
- 5. Add a forward slash and the word "images".
- 6. For example <u>https://hudpal.efoia-host.com/images</u>
- 7. Add a forward slash and the name of the image to insert into a message. This must be one of the images copied into the location in Step 1.
- 8. For example, <u>https://hudpal.efoia-host.com/images/testimage.jpg</u>.
- 9. Click OK. The image is inserted into the message.

8 Troubleshooting

Issue	Resolution
PAL Reading Room documents published as .TIF files are not having OCR correctly performed, and the content is not returned in matching search results	 To resolve the issue, follow these steps. (!!) Note: To follow these steps, use the Local Group Policy Editor. To use the Local Group Policy Editor, you must be logged on to the computer by using an account that has administrative permissions. Press the Windows key + R to open the Run window. Type gpedit.msc, and press Enter. Under Computer Configuration, expand Administrative Templates. Expand Windows Components, expand Search, and click OCR. Double-click Force TIFF IFilter to perform OCR for every page in a TIFF document. In the dialog box that opens, click Enabled, and click OK. Rebuild the Index.
