Bug Fixes

We've corrected numerous bugs and issues in v11.5.0, as outlined in the following table.

ID	Description
47896	Resolved a bug in which large files would not download completely from the PAL Reading Room and did not open. Files now download in their full original size and open as expected.
49111	Resolved an issue in which requests were rejected after deletion of a Requester Category in FX that was mapped to a NFP Requester Category on the PAL side.
55249	Adjusted the PAL outbound email limit to prevent more than 3 emails of the same template to the same recipient within 1 minute. Previously, the limit was preventing 3 emails of the same template within 1 minute, regardless of recipient.
56427	Corrected a bug in which PAL users could save SAML configuration fields without entering any data.
52018	Conducted a PRSSI Vulnerability Qualys Scan.
