v5.2.0

May 2023

eCASE Audit 5.2.0 Release Notes

New Features

The following new features were added to the latest eCASE Audit release:

ID	Feature	Description
23456	AM: Added "Prepared By" and "Prepared Date" fields	In Audit Management, we added new "Prepared By" and "Prepared Date" fields to the Procedure tab. These fields reflect the user who submitted the procedure for review, and the date it was submitted. These fields are exportable to the folder report for that project.
23952	AM: Resolve Individual Notes	In Audit Management, we added the ability to individually resolve notes, which helps auditors more easily determine which notes are pending versus which have been completed. There is also the option to "Bulk Resolve" or "Bulk Unresolve," which resolves/unresolves all notes at once.
23953	RT: Delete Update Field Entries	In Recommendation Tracking, we added the ability to delete update entries, for example if added in error. These delete actions are still logged in the Actions Log, which retains the original entry details for recordkeeping.

Bug Fixes

The following bug fixes were applied in the latest version of eCase Audit:

ID	Description
24744	Fixed an issue where the Project Teams tab for Recommendation Tracking folders did not auto-populate from the parent folder Project Staff tab.
