v5.7.0

July 2023

eCASE Audit 5.7.0 Release Notes

New Features

The following new features were added to the latest eCASE Audit release:

ID	Feature	Description
29982	Audit Performance Enhancements	Made performance enhancements to the audit application, specifically around the Procedure tab, opening of project.
30202	Project Template Filter	Added a filter to the Project Template, which allows users to view a single procedure group within the view.

Bug Fixes

The following bug fixes were applied in the latest version of eCASE Audit:

ID	Description
29303	Fixed an issue on the Pending Timesheet Approvals Report where the backup approver's name was imported incorrectly from TimeXpress.
29873	Fixed a bug where when importing procedures into the Project Templates, some data from the Project Template was not migrated to the procedure.
30009	Fixed a bug where, when the Project on Hold field was mandatory, users were unable to enter data in this field, preventing them from being able to create a new project.

ID	Description
30170	Fixed an issue where groups were not inheriting permissions from the Sensitive role as expected.
29134	Fixed an issue where procedures populated incorrectly due to the number of procedures present.
