v4.8.0

February 2023

eCase Investigations 4.8.0 Release Notes

New Features

The following new features were added to eCase Investigations 4.8.0:

ID	Feature	Description
18985	Bulk Index Import	Added a new feature to the Investigations Configuration that allows administrators to import indexes in bulk. To prepare for importing indexes, administrators must complete the appropriate excel sheet and upload it in the provided field under “Bulk Import of Indexes.” After import, the admin is notified of the success/failure status of individual indexes via email.
20036	Completed Course List	Added new dashboard widget for users and Training Managers displaying information on completed courses. By default, this list displays the logged-in user’s completed courses. For Training Managers, their respective users’ completed courses are listed here.
20163	Auto-Fill Date Referred Field	When creating a new Referral, the <i>Date Referred</i> field not auto-populates with the current date. This field can be edited if needed.
20164	EAC Referral Fields	For EAC Agents, we removed several unnecessary fields from the Referral to Others form to facilitate a more seamless workflow.
20165	Auto-Fill Status of Referral Field	For EAC Agents, the <i>Status of Referral</i> field will be set to “Closed” by default.

ID	Feature	Description
21125	Hotline and Whistleblower Attachment Names	Added an option under Investigations Configuration to allow for configurable Hotline Attachment and Whistleblower Attachment document names. If enabled, administrators can configure the name as it appears in the name and header of the attachment PDF
