1 Application Enhancements

The following new features were added to the latest eCASE Investigations release.

1.1 New Report Parameter: Lead Agent

ID# 53974, 55067, 55071, 55072, 55076, 55085, 55087, 57699, 57701, 57705, 62449, 62453, 62454, 62458, 62460, 62462, 62465, 62466, 62467, 62468

We've added a new Agent parameter for Reports in Investigations, which allows you to create Reports based on the Lead Agent assigned to the case. When an Agent is selected, the Report table will include all cases associated with that Agent. If the selected Agent was not on any cases during the selected period, the Report will not produce any results.

This change applies to the following COTS Reports, as well as some custom Reports:

- Investigation Cases By Case Status
- Civil Monetary Results Report
- Suspension/Debarment Referrals Report
- Admin Monetary Results Report
- Arrests Report
- Case Open Close Results Report
- Admin Referrals Report
- Civil Referrals Report

This parameter is also available to add to new custom reports.

1.2 Inventory Tab Updates

ID# 63255, 63256, 63257

We've made a few improvements to the *Inventory* tab, including the option to change field name terminology. Administrators can use the *Inventory Field Configuration* tab to make changes. We've also added the option to hide certain text box fields on the tab, including *Location Received*, *Agency*, *Address*, and *Case Number*. Finally, we added a filter for *Item Description*.

1.3 New Case Notifications By Case Type

ID# 65423

We added a new standard notification, which can be configured to alert specific users when a new case is created. These notifications are configurable based on case type, so different users can be notified when new cases are created under each case type in the application. This notification can be set up on the *Configuration* page (**Main Menu > Configuration > Configuration**).

1.4 New Fields: Organization Index

ID# 65777, 66114

New fields for *Employer* and *Occupation* have been added to the *Organization* form. These fields can be shown/hidden and marked as Required on the *Contacts Field Configuration* tab in Configuration (**Main Menu > Configuration > Contact Fields Configuration**).

1.5 Enable Location of Offense

ID# 66998

The *Enable Location of Offense* checkbox can now be marked as Required for all case types. You can set this require via the Configuration page (**Main Menu > Configuration > Complaint Configuration** under the *Field Configuration* section).

1.6 Site Numbers Field

ID# 67764

The *Site Numbers* field on the *Evidence* tab now accepts letters, so you can input *Site* values that include letters. Previously, this field only allowed numeric values.

1.7 Case Outcomes Report: Judicial District Parameter

ID# 68314

We've added an additional parameter to the *Case Outcomes Report* labeled "Select Judicial District." When a Judicial District is applied, the report will include all cases with the selected Judicial District. If there were no cases in the selected Judicial District during the selected period, no results will populate in the Report. In addition, we added a new *Judicial District* column to the results table.

2 Bug Fixes

The following bug fixes were applied in the latest version of eCASE Investigations:

ID	Description
12758	Addressed a bug where the TCD Box Number field was not clearing after the item was submitted for Bulk Final Disposition.
64377	Fixed a bug preventing approvals on a Request for Grant Extension from updating.
66566	Fixed an error message occurring when clicking on the Chain of Custody Report button in the Evidence Module.
67784	Corrected an issue where the Sensitive Case Office field was disabling when attempting to create a new case.
68388	Resolved a bug where configured App Role names were not displaying on the Staff tab of a new Case Type.
69410	Fixed an issue causing a “Contact Administrator” error to appear when attempting to close a Complaint.
69537	Addressed a bug preventing users from saving data within the application.
70626	Corrected a bug where documents with a title containing a single quote were not properly copied to the destination folder during case conversion.
