1 Investigations Enhancements for 5.17.0

The following new feature was added to the latest eCASE Investigations release.

1.1 Investigations Configuration Import Tool

ID# 81997

We've updated the Investigations Configuration Import Tool, enabling more efficient implementations for our customers. Now, customers can complete a form with their preferred configurations and the import tool automatically applies this configuration to the environment. This simplifies the configuration process and reduces the likelihood of errors related to improper configuration.

2 Bug Fixes

The following bug fixes were applied in the latest version of eCASE Investigations:

ID	Description
80163	Resolved an issue in which indexes associate to complaints submitted via the Hotline Portal with certain case attributes could be searched by users outside of the authorized office.
84195	Updated a misspelling in the <i>Country</i> drop-down menu of index entries.
84248	Fixed a bug occurring when users attempted to submit Close requests for Preliminary cases in which the page would refresh, and page data would not save.
