eCASE Investigations 5.2.0 Release Notes

New Features

The following new features were added to the latest eCASE Investigations release:

ID	Feature	Description
24810	Index Import Landing	After completing an Index Import, a new "Indexes" option appears. When clicked, the user is taken to the Indexes section of the C/P/I tab.
24910	Required Evidence Fields	Evidence items in an evidence case folder can now be saved without completing the "Date of Receipt," "Location Seized," and "Seized From" fields.
24928	Outreach Time and Cost Tracking	Added the ability to track time and cost associated with Outreach activities for C/P/I case types. Costs for outreach are added via the "Case Cost" tab within the Outreach case folder.
24983	Evidence Item Numbering	When agents create Evidence items, the "Item Number" field is editable. This number is automatically populated based on the "Search Site" but can now be edited. Additionally, the "Log Number" field now populates based on the overall count of evidence items and is no longer tied to the "Item Number."
25103	Investigations Closure Requirements	Updated the Investigation Close form so if the case status is set to "Investigation Complete" and all questions are answered, the agent can select the "Submit Close Request" option without needing to input a value in the "Reason for Closing" field.

Bug Fixes

The following bug fixes were applied in the latest version of eCASE Investigations:

ID	Description
25191	Fixed an issue where adding child attachments after a parent attachment was approved caused the child attachments to incorrectly copy fields from the parent.
25207	Fixed an Evidence issue where the "Receiving Agent" field was incorrectly updated to the Disapprover user while processing the evidence workflow.
25452	Fixed an issue where converting cases from Preliminary to Investigations caused some child attachments to incorrectly inherit properties from the parent attachment.
