August 2023

eComplaint 3.11.3 Release Notes

Bug Fixes

We've addressed the following bugs in the latest version of eComplaint:

ID	Description
28785	Fixed an issue where Issue names were not being displayed if the Issue was collapsed in the Claims and Bases tab.
29755	Fixed an issue where saving a folder that was already closed caused an error to appear in the error log.
30241	Fixed an issue where accessing the Email Log after sending an email through the Send ROI popup would cause an error.
30258	Fixed an issue where sending an email from the Initiate Investigation task would fail, and the event log did not reflect the correct email-related information for that task.
30992	Fixed an issue where eComplaint portal forms that were sent back for correction and resubmitted by a portal user did not retain information that was not changed in correction.
31371	Fixed issues with the search functionality on the Add/Search Complaints page in Joint Processing Unit regarding searching with Issues, Bases, and the Incident Date range.
31683	Fixed an issue where clicking on "Join Selected Complaints" on the Search Complaints page of Joint Processing Units would cause an error.
